Ahmad Abdul-Jawad Mahmood

iOS Tech Lead / Architect / Founder & CTO, Buraq

// 12+ years shipping iOS at scale · Cairo → Riyadh · Millions of users across MENA

12+	35M+	20+
YEARS IN iOS	PROJECTS SHIPPED	USERS REACHED	RESTAURANTS → MARN

```
/**
 * Senior iOS Tech Lead with 12+ years leading mobile teams and architecting
 * scalable iOS applications. Expert in modern SwiftUI, team leadership, and
 * shipping
 * high-performance apps used by millions across the MENA region — and, since
 * March 2026,
 * Founder & CTO of Buraq (buraqexpress.com), an Egyptian ride-hailing platform
 * built solo.
 * iOS & Android apps, a hardened NestJS / PostgreSQL backend, a 29-screen ops
 * console, and the web app.
 */
```

experience() 8 roles

iOS Tech Lead @ Marn — Jahez Group

RIYADH, KSA — Aug 2020 → Aug 2026

- Lead and mentor an iOS team of **5+ developers** building enterprise POS solutions.
- Architect offline-first systems with CoreData + seamless cloud sync, serving **20k+ restaurants** and cafés.
- Design sophisticated table management, order processing, and inventory tracking systems.
- Spearhead the migration to SwiftUI and modern patterns (Combine, async/await).
- Optimized performance for **40% faster load times** and **99.9% crash-free** rate.
- Established CI/CD pipelines and automated testing, cutting deployment time by **60%**.

Founder & CTO — iOS · Android · Backend · Web @ Buraq — buraqexpress.com

CAIRO → RIYADH · REMOTE · TECHNOLOGIES

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: chose the stack, set the standards, and built nine repositories from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqexpress.com**. Every screen governed by explicit rules: Screenshot-tested, double-entry accounting, acyclic module boundaries, and a CI suite that gates the merge. Now preparing a cash-only team beta in Cairo.

Backend API
`NestJS · TypeScript · Fastify · Prisma · PostgreSQL · Redis · BullMQ · Socket.IO · Docker · Sentry · Pino · Zod · Swagger · Jest · Testcontainers · GitHub Actions`

Modular monolith, **22 modules** in an explicit graph — **trip state machine**, **scored nearest-N dispatch** with a 90-second offer timeout, **double-entry ledger** with immutable entries and materialized balances, **PIN** and multi-step rides, live realtime **Socket.IO** gateways, **JWT** / **OAuth** / **OTP** auth with **RBAC**, idempotency and audit log, **330+ endpoints** over 55 controllers, 43 entities, **2,935** tests. Swagger docs.

Ops Console
`Next.js 15 · React 19 · Tailwind · shadcn/ui · TanStack Query · Zustand · Recharts · Zod · Vitest · Playwright`

29-screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance, reconciliation, refunds and payouts, cash control, app **zone editor**, feature flags, audit log. **Google SSO** · English and Arabic, 179+ tests.

iOS · Rider & Captain
`SwiftUI · Swift 6 · iOS 17+ · MapLibre · Socket.IO · Keychain · Xcode 16 · Fastlane`

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** on live GPS, Socket.IO feeds with crash-honest reconnect, chat, wallet and payments, **Live Activities**, Dark mode booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,000+ tests**, strict concurrency.

Android · Captain
`Kotlin · Jetpack Compose · Material 3 · Hilt · Retrofit · OkHttp · Coroutines · Flow · Room · Google Maps SDK · Gradle KTS`

Native port against the **same API contract** — 18 feature modules on convention plugins, Hilt, a pure-Kotlin domain; onboarding, the shift's foreground service and the trip end to end, running against the backend · **1,500+ tests**.

Android · Rider
`Kotlin · Jetpack Compose · Material 3 · Hilt · Retrofit · OkHttp · Coroutines · Flow · Room · Google Maps SDK · Gradle KTS`

Screen-by-screen parity port of the iOS rider app · 17 feature modules · a pure-Kotlin **buraq-core-android** (Gradle Packages) · **2,200 tests**, including 351 screenshot goldens and a live-backend suite.

Web · buraqexpress.com
`Next.js 16 · React 19 · Server Components · Tailwind v4 · shadcn/ui · Framer Motion · Zod · Vitest · Playwright · Vercel`

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public driver share pages and app links · Arabic and English (RTL), **WCAG 2.2 AA**, **1,800+ tests** · **live on Render since 15 Oct 2026.**

One backend · one contract · six client surfaces — and the company around them: incorporation, the Law 151/2020 data-protection filing, a printing-ready brand kit, privacy forms, the business model and investor materials, the go-live plan. 3,100+ commits, one author — so I know exactly what I sell for ending of the team I hire.

Senior iOS Engineer @ HarmâLlur · voluntary charity project

Dec 2025 → Jun 2026

- Designed an architecture integrating **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

iOS Tech Lead @ Ego — Ride Hailing

Mar 2018 → May 2019

- Developed a ride-hailing ecosystem (iOS, watchOS) serving **15M+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, MyFatoorah, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero

Sep 2016 → Mar 2018

- Contributed to a major food-delivery platform serving **20M+ users**.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

iOS Developer @ AlKapedh

May 2014 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Security and Core Data functionalities.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1/2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[]

selected

[01] ai / privacy

HarmâDlur — Privacy Browser

`SwiftUI · CoreML · WKWebView · CoreImage · Vision`

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

- AI-powered privacy browser

[02] full-stack

Buraq — Ride-Hailing

`NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · MapLibre · SwiftUI · Kotlin · Jetpack Compose`

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, live realtime gateways, 2,900+ tests), a 29-screen ops console, rider and captain apps on iOS and Android, and the public web app at buraqexpress.com.

- Founder & CTO · nine repos · 330+ tests

[03] delivery

HungerStation

`iOS · Firebase · Real-time APIs · Perf`

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

- 4.5 / 5 · 1.9M+ ratings

[04] mobility

Ego — Ride Hailing

`MapKit · Core Location · Social SDKs`

Ride community app — prayer times, mosque finder, and community features with enhanced location + social integration.

- 4.7 / 5 · 211.8k+ ratings

[05] enterprise

Marn — iPad POS

`SwiftUI · CoreData · CloudKit · Real-time Sync`

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 · 2,427 ratings

[06] community

Daleela

`MapKit · Core Location · Social SDKs`

Multi-community app — prayer times, mosque finder, and community features with enhanced location + social integration.

- 4.5 / 5 · 1,287 ratings

honours[]

01 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain.

02 Built a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

03 Founded **Buraq** (buraqexpress.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app. Live since Oct 2026 · **hardened** · **330+ automated tests.**

04 Led a POS system serving **20k+ restaurants** and cafés.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ iOS projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) & early SwiftUI adopter (WWDC 2019).
