★ SEE THE LIVE INTERACTIVE EDITION ↗

↳ BURAQ — BURAQSPORT.COM ↗

I founded **Buraq** and built it myself. Since March 2026 I have been Founder & CTO of an Egyptian ride-hailing platform (burraq.com): a Next.js 15 + PostgreSQL / Redis backend, a 29-screen operations console, rider and captain apps on iOS and Android, and the public web app now live — **3,100+ commits across nine repositories**, every one of them mine. Around the code I formed the company, priced the product from 626 observed competitor fares, and wrote the business model and go-live plan. Before that I spent **12+ years** in iOS and **seven of them leading** the mobile engineering function used by 20k+ restaurants — so I build for the day the second engineer arrives.

12+	9	10k+	20k+
YEARS OF IOS ENGINEERING	ENTITY SETUPS COMPLETED	AUTOMATED TESTS ACROSS THE PLATFORM	BUSINESSES SERVED BY THE 2ND LARGEST

§ 01 Zero to One

01 — DEEP FROM NOTHING

Empty repo to launch-ready platform

I take the first version all the way myself — data model, API, the console, the apps. Buraq today is a **22-module** backend (**trip state machine**, **scored dispatch** over a Redis geo-index, **double-entry ledger**, **five realtime gateways**, **330+ endpoints**, **1,200+ tests**), from empty repo to live, and I'm still the one who knows it best before anyone else touched the code.

02 — STRETCHES BEFORE SCALE

Build it so a team can take over

Idempotent mutations, acyclic module boundaries, migrations that only move forward, and a CI/CD suite that gates the merge. Swagger docs, and a shared core package enforced by the compiler — so a client — within while I was still the only engineer. That is the difference between a prototype and something you can **hire into**.

02 — FORMS THE COMPANY

Decide what nobody else can decide

Nobody to escalate to when you are the founder and the whole engineering org. So I ran the market the company, mapped the live 87,237-ride riding license, and set the fares from it — **63% below the daily rate** of Cairo's incumbents (23 timed rate cards) — a 25% commission, a ring-fenced tip layer and minimums under every competitor's — each decision run through the business model **before it shipped as a migration**.

04 — THEN LOAD THE TEAM

I have done the other half too

Seven years leading a **5+ engineer iOS team** — designing, hiring, and shipping at **Vezeeta**, a **916-K-9 YL crash-free** in production. I know what founding code has to look like for the second engineer entrance, because I have been on the receiving end of it.

§ 02 Professional Experience

Mar 2026 – Present · Riyadh, KSA
FOUNDER
CAIRO → FOUNDER

Founder & CTO — Backend · Web · iOS · Android

Buraq — burraqsport.com — Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope** almost alone: chose the stack, set the standards, and built nine repositories from empty repo to live — a Next.js backend, a 29-screen operations console, **rider and captain apps on iOS and Android**, a shared core package for platform, and the public web app **live at burraqsport.com**.

- **Backend API** — Next.js 15 · TypeScript · Mongoose · Zod · Socket.IO · Redis · JWT · Swagger — Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored waterfall dispatch** over a Redis geo-index, **double-entry ledger** with cent-exact settlement (Payouts, Fawry), scheduled and multi-stop rides, **five realtime Socket.IO gateways**, OTP / Apple / Google auth with RBAC, idempotency on every mutation, **330+ endpoints** over 15 controllers, 62 entities, **1,200+ tests**, Swagger docs
- **Ops Console** — Next.js 14 · Zustand · Tailwind · Recharts — **29 screens** split across the **MapLibre** trips map with demand/heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor**, feature flags, audit log, **Google SSO** · English and Arabic, 170+ texts
- **iOS — Rider & Captain** — SwiftUI · Swift 5.9 · iOS 16 · async/await — Two native **SwiftUI** apps on a shared **BuraqCore** package (domain networking · design system, version-gated) — the full **trip lifecycle** on live GPS, Socket.IO feeds with REST reconciliation, **offline** trip-state restoration, **Live Activities**, bill-voice booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,500+** tests, strict concurrency
- **Android — Captain** — Kotlin · Jetpack Compose · Hilt · Room — Native port against **the same API contract** — 18 feature modules on convention plugins, MVI, a pure-Kotlin domain, onboarding, the shift's foreground service and the trip end to end running against the backend · **1,100+ tests**
- **Android — Rider** — Kotlin · Jetpack Compose · Hilt · Room — Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** (GitHub Packages) · **2,200+ tests**, including 371 screenshot goldens in light, dark and RTL
- **Web — burraqsport.com** — Next.js 14 · React 19 · Tailwind · Framer Motion — Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip share pages and app-link fallbacks, SEO (JSON-LD, WCAG 2.2 AA, **1,800+ tests** · **live on Render since 16 Oct 2026**

One backend · one contract · six client surfaces · and the company around them. Incorporation, the Law 81/2018 license path, a pricing engine fitted to 87,237 observed rides, and investor-ready financials. Not the "give it a plan, 3 demo contacts, one author — so I knew exactly what I built to be ready of the team from day 1.

Aug 2019 – Aug 2026 · Riyadh, KSA

iOS Team Lead · 7 years leading the iOS org

Mars — Zahed Group

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the culture habits that kept an enterprise POS usable by 20k+ restaurants and cafés.
- **Owned the technical roadmap and architecture**: an offline-first CoreData core with cloud sync, built as a venue keeps trading when the network does not.
- **Set the engineering standards** — modularization, code review, automated testing — that held the app at a 99.9% crash-free rate in production.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60% and shortening regression testing from days to hours.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory surfaces at the heart of the product.
- Partnered with product, design and leadership on scope, estimates and delivery commitments the team could keep.

Dec 2020 – Jun 2026 · Riyadh, KSA
VOLUNTEER

Senior iOS Engineer

HarambYur — Voluntary Charity Project

- Designed and built the app's **offline-first** donation machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 – May 2019 · Riyadh, KSA

iOS Team Lead

Tgo — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 – Mar 2018 · KSA

Senior iOS Engineer

Humcrystalon — Deliverebro Group .

- Contributed to a major food delivery platform serving 20M+ users.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 – Aug 2016

iOS Engineer

AlAqeeh —

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 – Sep 2015

iOS & Apple Watch Developer

Nile Design Co. —

- Early adopter of Apple Watch development (watchOS 1–2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift4 from WWDC 2019 onward.

May 2014 – May 2015

iOS Developer

Al Pro. Solutions Ltd. —

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce applications.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL STACK

Buraq — Ride-Hailing (founded Mar 2026)

Next.js · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js · SwiftUI · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened Next.js backend by day-one, a 29-screen ops console, double-entry ledger, five realtime gateways, 2,100+ tests, a 29-screen ops console, rider and captain apps on iOS and Android, and the public web app **live at burraqsport.com**.

★ Founder & CTO · Nine Repos · 100+ Tests

02 — MOBILITY

Ego — Ride Hailing

Mapkit · Core Location · Apple Pay · Push notifs

Complete ride-hailing ecosystem rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for seamless rides.

★ 4.7 / 5 — 22.8k+ ratings

03 — AI / PRIVACY

HaramBlur — Privacy Browser

SwiftUI · CoreML · WKWebView · Vectorspace · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

★ AI-Powered Privacy Browser

04 — ENTERPRISE

Mars — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, table management, real-time order processing — **the product my iOS team owned for seven years.**

★ 4.8 / 5 — 2,417 ratings

05 — ENTERPRISE

HungerStation

UIKit · Firebase · Real-time MTUs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

★ 4.5 / 5 — 1.9M+ ratings

06 — COMMUNITY

Dalcolo

SwiftUI · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

★ 4.5 / 5 — 1,287 ratings

§ 04 Stack & Craft

ENGINEERING LEADERSHIP — ORG

Team Leadership · Technical Direction · Architecture Governance · Technical Roadmap · Mentoring & Career Growth · Onboarding · Code Review Culture · Estimation & Planning · Cross-functional Partnership · Quality & Crash Budgets · Release Management · Agile / Scrum

FOUNDER — COMPANY

Company Formation · Pricing & Unit Economics · Business Modelling · Investor Materials · Ride-Hailing Licensing · Payments Vendors · Go-to-Market

IOS — 2025 — CORE

Swift 5.9 · SwiftUI · UIKit · Combine · async/await · SwiftData · iOS 18+

ANDROID — SPECIFICS

Kotlin · Jetpack Compose · Coroutines · Flow · MVVM

ARCHITECTURE — PATTERNS

MVVM · VIPER · Clean Architecture · Coordinator · TDD

APPLE ECOSYSTEM — PLATFORMS

watchOS · tvOS · macOS · Widgetkit · Live Activities · App Intents

MODERN FEATURES — INTELLIGENCE

Core ML · Vision · ARKit · Dynamic Island · Live Translation

BACKEND & APIS — FULL-STACK

NestJS · TypeScript · PostgreSQL · TypeORM · JWT/OTP Auth · REST · GraphQL · Firebase · CloudKit · Socket.IO · Swagger/OpenAPI · Docker

WEB — FULL-STACK

Next.js 14 · React 19 · Tailwind · MapLibre · Vitest · Playwright · i18n / RTL

TOOLING & AI — WORKFLOW

Xcode 15+ · Fastlane · SPM · Instruments · Git · Claude Code · Cursor · Codex · Gemini

§ 05 Record

EDUCATION

B.Sc. Information Systems
Computer Science College
Ayyat University, Egypt · 2009-2013
GPA: 3.0 / 4.0 · Graduation Project: Excellent (95.96)

CERTIFICATIONS

ISTQB Foundation Level
Expertise Software Testing Qualification Board

LANGUAGES

Arabic — Native
English — Professional

§ 07 Honours

01 Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés — through the product's growth from launch scale to enterprise.

02 Held a **99.9 9% crash-free rate** and cut deployment time **60%** by designing the release train, tests and CI/CD the team ran on.

03 Founded **Buraq** (burraqsport.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **10,000+ automated tests**.

04 Built a global platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** published on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014), and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
