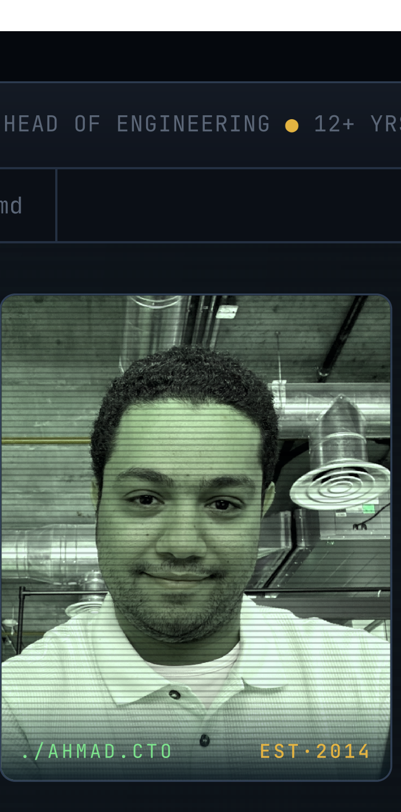
Ahmad Abdul-Jawad Mahmoud

Chief Technology Officer / Head of Engineering / Founder & CTO, Buraq

// **12+ years** building · **8+ leading teams** · Cairo → Riyadh · millions of users across MENA



12+	**8+**	**35M+**	**20k+**
YEARS ENGINEERING	YEARS LEADING TEAMS	USERS REACHED	BUSINESSES ON THE POS I LED

```
/**
* Chief Technology Officer — 12+ years building, 8+ leading.
* Seven of them running the iOS org behind a POS platform trusted by 20k+
* restaurants and cafés: technology strategy, architecture and roadmap, the
* standards a team runs on, and the answer for delivery.
* Since March 2026 I have also carried the whole scope of a founder and CTO
* alone at Buraq (buraqegypt.com), an Egyptian ride-hailing platform I built
solo:
* backend, 29-screen ops console, iOS & Android apps, and the public web app,
live —
* so no layer of the stack is a black box when I am deciding for a company.
*/
```

## technology_office()

4 pillars

[01] technology strategy

Choose the bets, own the consequences

Stack, architecture and roadmap as one decision — platform choices, module boundaries, data models, security posture, and **migrations that keep a codebase current without stalling the business.**

◆ 7-year production POS moved to SwiftUI mid-flight

[02] organisation & talent

An engineering function, not a headcount

Seven years building and leading a **5+ engineer team**: onboarding, mentoring, career growth, and a review culture where quality is the default.

◆ 99.8–99.9% crash-free under enterprise load

[03] delivery & operations

Commitments the company can plan around

CI/CD and release automation built from nothing, suites that gate merges, explicit performance and crash budgets, planning the team can keep.

◆ 60% faster deployments · 40% faster load times

[04] whole-stack ownership

No layer is someone else’s problem

Backend, web, iOS and Android — at Buraq I built and run **all of it solo**, and formed the company around it.

◆ 9 repos · 1 contract · 1 founder

## experience()

8 roles

iOS Team Lead @ Marn — Jahez Group

Aug 2019 → Aug 2026

RIYADH, KSA

+ **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by **20k+ restaurants** and cafés.
+ **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
+ **Set the engineering standards** — module boundaries, code review, automated testing — holding the app at a **99.8–99.9% crash-free** rate in production.
+ **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
+ **Built CI/CD and the release process from scratch**, cutting deployment time **60%** and shortening every engineer's feedback loop.
+ Ran the performance programme (**40% faster load times**) and designed the table-management, order-processing and inventory systems at the product's core.
+ Partnered with product, design and backend leadership on scope, estimates and delivery commitments.

Founder & CTO — iOS · Android · Backend · Web @ Buraq — buraqegypt.com

Mar 2026 → Present CURRENT

CAIRO · FOUNDER · BURAQ TECHNOLOGIES

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: chose the stack, set the standards, and built nine repositories from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqegypt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI suite that gates the merge. Now preparing a cash-only lean beta in Cairo.

› **Backend API**
// NestJS · TypeScript · Mar ’26 → now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored waterfall dispatch** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop rides, five realtime **Socket.IO gateways**, OTP / Apple / Google auth with RBAC, idempotency and audit log · **330+ endpoints** over 55 controllers, 62 entities, **2,900+ tests**, Swagger docs.

› **Ops Console**
// Next.js 14 · Jul ’26 → now

29-screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor**, feature flags, audit log, **Google SSO** · English and Arabic, 170+ tests.

› **iOS · Rider & Captain**
// SwiftUI · Swift 6 · Jul ’26 → now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** on live GPS, Socket.IO feeds with fresh-token reconnect, chat, wallet and payments, **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,000+ tests**, strict concurrency.

› **Android · Captain**
// Kotlin · Jetpack Compose · Aug ’26 → now

Native port against **the same API contract** — 18 feature modules on convention plugins, Hilt, a pure-Kotlin domain; onboarding, the shift's foreground service and the trip end to end running against the backend · **1,500+ tests**.

› **Android · Rider**
// Kotlin · Jetpack Compose · Sep ’26 → now

Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** (GitHub Packages) · **2,200+ tests**, including 371 screenshot goldens in light, dark and RTL.

› **Web · buraqegypt.com**
// Next.js 16 · React 19 · Oct ’26 → now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 15 Oct 2026**.

One backend · one contract · six client surfaces — and the company around them: incorporation, the Law 87/2018 licence path, a pricing engine fitted to 626 observed fares, the business model and investor materials, the go-live plan. 3,100+ commits, one author — so I know exactly what I will be asking of the team I hire.

Senior iOS Engineer @ HaramBlur · voluntary charity project

Dec 2025 → Jun 2026

+ Designed an architecture integrating **on-device machine learning** for real-time content analysis.
+ Built a seamless communication layer between native iOS and web-based content.
+ Implemented efficient image processing with region-based and full-image blur effects.
+ Created a real-time video monitoring system for continuous content filtering.
+ Developed smart banner blocking and optimised memory management throughout.

iOS Team Lead @ Ego — Ride Hailing

Mar 2018 → May 2019

RIYADH, KSA

+ Developed a ride-hailing ecosystem (iOS, watchOS) serving **15M+ users** in Saudi Arabia.
+ Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
+ Integrated Apple Pay, HyperPay, and push-notification infrastructure.
+ Created seamless iPhone ⟷ Apple Watch handoff for continuous ride tracking.
+ Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero

Sep 2016 → Mar 2018

KSA

+ Contributed to a major food-delivery platform serving **20M+ users**.
+ Optimised app performance for high-volume transaction processing.
+ Implemented real-time order tracking and delivery optimisation.
+ Collaborated with backend teams on API design and integration.

iOS Developer @ ALNapedh

May 2016 → Aug 2016

+ Developed food-ordering apps with Firebase integration and real-time features.
+ Implemented Spreedly payments and live-chat functionality.
+ Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co.

Jul 2015 → Sep 2015

+ Early adopter of Apple Watch development (watchOS 1–2).
+ Built a foundation in iOS and watchOS app development.
+ Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd.

May 2014 → May 2015

+ Foundation iOS experience in Objective-C and early Swift.
+ Built social networks and e-commerce platforms.
+ Learned core iOS principles and App Store deployment.

## projects[]

selected

[01] ai / privacy

HaramBlur — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur, live video monitoring.

◆ AI-powered privacy browser

[02] full-stack

Buraq — Ride-Hailing

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, five realtime gateways, 2,900+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqegypt.com**.

◆ Founder & CTO · nine repos · 10k+ tests

[03] delivery

HungerStation

UIKit · Firebase · Real-time APIs · Perf

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Performance and real-time order tracking.

★ 4.5 / 5 — 1.9M+ ratings

[04] mobility

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · watchOS

Complete ride-hailing ecosystem: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 15M+ users.

★ 4.7 / 5 — 211.8k+ ratings

[05] enterprise

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

★ 4.8 / 5 — 2,437 ratings

[06] community

Daleelo

MapKit · Core Location · Social SDKs

Muslim community app — prayer times, mosque finder, and community features with enhanced location + social integration.

★ 4.5 / 5 — 1,287 ratings

## honours[]

01 Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés.

02 Held a **99.8–99.9% crash-free** rate and cut deployment time **60%** with the standards, tests and CI/CD the team ran on.

03 **Founded Buraq** (buraqegypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **10,000+ automated tests**.

04 Built a food-delivery platform serving **20M+ users** and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) & early SwiftUI adopter (WWDC 2019).
