→ BURAQ — BURAQEGYPT.COM ↗

Engineering leader with **12+ years** building and **8+ leading** — including **seven consecutive years** running the same 5+ engineer iOS team through a product's growth from launch to an enterprise POS serving 20k+ restaurants across Cairo. I grow engineers, protect the quality bar, and make delivery predictable: onboarding, mentoring, review culture, CI/CD, and honest estimates with architecture and design. I stayed technical the whole time — I still architect, still review, and still ship. Based in Cairo, Egypt. Founder & CTO of Buraq (buraqegypt.com), an Egyptian ride-hailing platform I built solo across backend, web, and iOS.

12+ YEARS IN ENGINEERING

8+ YEARS LEADING ENGINEERING TEAMS

7yrs SAME IOS TEAM

20k+ RESTAURANTS REACHED BY THE POS I LED

§ 01 How I Run a Team

01 — People & Growth

Grow engineers, not just features

Seven years with one team: onboarding that gets a new engineer productive fast, mentoring and career conversations, and pairing on the problems that matter. **Retention through a seven-year product** is the result I am proudest of — the same people got better, together.

02 — Quality & Standards

Quality is a default, not a phase

Module boundaries, review culture, and automated testing that held an enterprise POS at **a 99.8–99.9% crash-free rate** in production — not a prototype or a performance that made the app **40% faster to load**.

03 — Delivery & Predictability

Estimates the team can keep

CI/CD and release automation built from nothing: **60% faster deployments**, zero-bad-gate merges, and planning with product and design in commitments nobody has to walk back. Scope conversations happen before the sprint, not during it.

04 — Technical Ownership

I can still review any PR on my team

I lead technically as well as organizationally: I drove the multi-year Swift(UI) modernization, event-driven migration, and at Buraq I built a ride-hailing platform that serves a live customer base, a Next.js console, the web app, and iOS and Android apps — 3,100+ commits, 16,000+ tests.

§ 02 Professional Experience

Aug 2019 — Aug 2026
Miyazaki, Japan

iOS Team Lead — 7 years leading the iOS org

Grab · James Group

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by **20k+** restaurants and cafés.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — that held the app at a **99.8–99.9% crash-free rate** in production.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product and leadership.
- **Built CI/CD and the release process from scratch,** cutting deployment time **60%** and shortening every engineer's feedback loop.
- Ran the performance programme (40% faster load times) and designed the table-management, ordering and payment-processing systems at the heart of the product.
- Partnered with product, design and leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 — Present
CURRENTLY
Cairo · Founder

Founder & CTO — iOS · Android · Backend · Web

Buraq · buraqegypt.com · **Buraq Technologies**

Founded an Egyptian ride-hailing platform and have started to **evolve technical scope** above. Owns the stack, the standards, and hands-on delivery across riders from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package for platform, and public web pages at **buraqegypt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry ledgers, and a test suite that gates every merge. Now preparing a cash-less beta in Cairo.

Backend API
Node.js · TypeScript · Mar 26 – now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored waterfall dispatch** over a fleet-wide **H3 geo-index**, **double-entry ledger** with **idempotent** mutations, **outbox** delivery, **JWT** auth and **role-based** access, **Paymob** + Fawry, scheduled and multi-stop rides, fee realtime **SocketIO gateway**, **FCM** push, **Docker** build with HMR, **RBAC**, idempotency and audit log · **330+ endpoints** over 66 controllers, 62 entities, **3,900+ tests**, **boulder** docs.

Ops Console
Next.js 14 · Jun '26 – now

29 screen ops surface — live **MapLibre** trips with **dead-reckoned** tweening, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, real-time **editor**, fare tuning, audit log. **Google SSO** + Google Analytics, **i18n** tools.

iOS · Rider & Captain
SwiftUI · Swift 6 · Jul '26 – now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain, networking, **realtime** client, **offline** queue, **i18n**, **RTL**) and **lifecycle** on-line GPS, SocketIO feeds with fresh-token reconnect, **APNs** push, and public web **Live Activities**. Siri voice booking, on-device ID verification, captain earnings and navigation — 240 views, **1,800+ tests**, strict concurrency.

Android · Captain
Kotlin · Jetpack Compose · Aug '26 – now

Native port against the **same API contract** — 18 feature modules on convention plugins, Hilt, a pure-Kotlin domain, **offline**-first sync, **foreground** service for the trip and end-to-end running against the backend · **1,300+ tests**.

Android · Rider
Kotlin · Jetpack Compose · Sep '26 – now

Rider-app mirror of the captain build, with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 19 Oct 2026.**

Web · buraqegypt.com
Next.js 14 · React 19 · Oct '26 – now

Public marketing, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 19 Oct 2026.**

One backend · one contract · six client surfaces — and the company around them: incorporation, the law firm's 3,000-page charter, a pricing engine fitted to ride economics, the business model, and investor conversations. The lone plan. 3,100+ commits, one author — so I know exactly what I will be asking of the team I hire.

Dec 2025 — Jun 2026
Volunteer

Senior iOS Engineer

HarandBur · **Volunteering Charity Project**

- Designed an architecture integrating on-device machine learning for real-time content safety.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with background-task and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

Mar 2018 — May 2019
Riyadh, KSA

iOS Team Lead

Sy · **The Ride-Hailing App**

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 — Mar 2018
KSA

Senior iOS Engineer

HungerStation · **Deliveryhero Group**

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016

iOS Developer

AlAqaath

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Specularly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 — Sep 2015

iOS & Apple Watch Developer

Nile Design Co.

- Early adopter of Apple Watch development (watchOS 1–2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift from WWDC 2014 onward.

May 2014 — May 2015

iOS Developer

UA Pro. Solutions Ltd.

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — Full-Stack

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js · SwiftUI · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, fee realtime gateway, 2,900+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqegypt.com**.

• Founder & CTO · Nine Repos · 3,100+ Tests

02 — Solo Project

Egy — Ride Hailing

MapKit · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

• 4.7 / 5 — 211.8K+ ratings

03 — Full-Stack

HarandBur — Privacy Board

SwiftUI · CoreML · MVVM-Clean · CoreImage · Vision

Privacy-focused iOS community app with on-device, powered content detection and filtering. On-device ML, smart blur effects, media monitoring.

• AI-Powered Privacy Browser

04 — Enterprise

Mars — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés. Offline-first with CoreData + CloudKit sync, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

• 4.8 / 5 — 2,437 ratings

05 — Unicorn

HungerStation

XCUIT · Firebase · Real-time APIs · Performance

Major food-delivery platform serving 20M+ users across Saudi Arabia and Middle East. Focused on performance and real-time order tracking.

• 4.5 / 5 — 1.9M+ ratings

06 — Creative

Daleeda

MapKit · Core Location · Social SDKs · Community

Multi-community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

• 4.6 / 5 — 1,287 ratings

§ 04 Stack & Craft

ENGINEERING LEADERSHIP — ORG

Team Leadership · Technical Direction
Architecture Governance · Technical Roadmap
Mentoring & Career Growth · Onboarding
Code Review Culture · Estimation & Planning
Cross-functional Partnership · Quality & Crash Budgets
Release Management · Agile / Scrum

FOUNDER — COMPANY

Company Formation · Pricing & Unit Economics
Business Modelling · Investor Materials
Ride-Hailing Licensing · Payments Vendors
Go-to-Market

IOS — 2025 — CORE

SwiftUI 6.0 · SwiftData · iCK3 · Combine · async/await
SwiftTesting · iOS 18+

ANDROID — 2025 — NATIVE

Kotlin · Jetpack Compose · Coroutines · Flow · MVVM

ARCHITECTURE — PATTERNS

MVVM · VIPER · Clean Architecture · Coordinator
TDD

APPLE ECOSYSTEM — PLATFORMS

watchOS · tvOS · macOS · WidgetKit
Live Activities · App Intents

MODERN FEATURES — INTELLIGENCE

Core ML · Vision · ARKit · Dynamic Island
App Tracking

BACKEND & APIS — FULL-STACK

NestJS · TypeScript · PostgreSQL · TypeORM · Redis
JWT/OTP Auth · REST · GraphQL · Firebase · CloudKit
Socket.IO · Swagger/OpenAPI

TOOLING & AI — WORKFLOW

Xcode 16+ · Fastlane · TestFlight · Instruments
Git · Claude Code · Copilot · Cursor

§ 07 Honours

01 Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés — through the product's growth from launch scale to enterprise.

02 Held a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the shared iOS tools and CI/CD the team ran on.

03 **Founded Buraq** (buraqegypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **16,000+ automated tests.**

04 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05 **10+ apps** published on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
