Senior software engineer with **12+ years** shipping production software — native iOS first, now across Android, backend and web. I have built apps used by **35M+ people** HungerStation, Ego ride-hailing, and for seven years the Marra POS used by 2k+ restaurants and cafés, where I owned an offline-first CoreData core with cloud sync and held a **99.8–99.9% crash-free** rate. Right now I am building a production ride-hailing platform end to end, **solo**: a NestJS / PostgreSQL / Redis backend, a Next.js operations console, and native iOS & Android apps on one API contract.

12+	35M+	99.8%+	3,700+
YEARS HANDS-ON	RIDERS RECEIVED ACROSS SHIPPED APPS	CRASH-FREE RATE IN PRODUCTION	AUTOMATED TESTS ON MY CURRENT PLATFORM

§01 How I Engineer

01 — SYSTEMS DESIGN

Design for the failure case

An offline-first CoreData + cloud-sync core so a ranger keeps trading when the network does not. A **tri-state machine, scored dispatch** over a Redis geo index and a **double-entry ledger** with compensating transactions, so a retry can never double-charge.

02 — QUALITY YOU CAN MEASURE

Tests gate the merge

Automated tests that block bad merges, CI/CD built from nothing (**iOS faster deployments**), and a **99.8–99.9% crash-free rate** in production. On my current platform: **2,700+ backend** and **800+ iOS** tests.

03 — SHIP WITHOUT STOPPING

Modernise in flight

A multi-year move to SwiftUI, Combine and async/await without pausing feature delivery, and a performance programme that cut load times **40%**. Swift 6 strict concurrency actors and structured concurrency in new code.

04 — END-TO-END OWNERSHIP

Credible at every layer

Native iOS (SwiftUI) and Android (Kotlin / Compose) clients on shared, versioned core libraries; NestJS / PostgreSQL / Redis backends; a Next.js console. I build and run **four layers of a production platform myself**.

§02 Professional Experience

Aug 2019 → Aug 2026 · RIYADH, KSA

iOS Team Lead · 7 years leading the iOS org

Marra — Jahez Group ↗

- **Owned the architecture** of an enterprise POS used by 20k+ restaurants and cafés: an offline-first CoreData core with cloud sync, built on a venue keeps trading when the network does not.
- **Designed the core systems** — table management, order processing and inventory — at the heart of the product.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery.
- **Held a 99.8–99.9% crash-free rate** in production through clear module boundaries, code review and automated tests that gate merges.
- **Built CI/CD and the release process** from nothing, cutting deployment time 60%, and ran the performance programme behind 40% faster load times.
- **Led and mentored the engineers** across iOS teams for seven years, and partnered with product, design and backend on scope and estimates.

Mar 2026 → Present · CURRENT · INDEPENDENT

Founding Platform Architect — iOS · Android · Backend · Web

Ride-Hailing Platform · Independent Project

Took the **full technical scope of a founding CTO** and carried it alone: chose the stack, set the standards, and have been building a production ride-hailing platform — a hardened backend and a real-time ops console **in production**, with native **iOS/SwiftUI** and **Android/Compose** apps (Rider & Driver) on each to arrive. Development. Every layer from data model to realtime, governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries and a CI test suite that gates the merge.

Backend APIs
NestJS · TypeScript · Mar '26 → now

Modular monolith, **33 modules** — **trip state machine, scored dispatch** over a Redis geo index, **double-entry ledger**, realtime rider/driver/admin **sockets**, JWT + atomic-OTP, idempotency & audit log — 320 endpoints over 47 controllers, traffic-aware fare quotes, **2,700+ tests & seven years.**

Admin Console
Next.js 14 · Jun '26 → now

Bespoke **30-screen** ops surface — live **MapLibre** trips map, dispatch & incident tools, KYC onboarding review, finance reconciliation, refunds/payouts, cash control, map **zone editor**, feature flags, audit log. **Google SSO.**

iOS Apps · Rider & Driver
SwiftUI · Jul '26 → now

Two native SwiftUI apps on a shared **BuraqCore** Swift package (domain · networking · design system, pinned remotely) — live GPS **trip lifecycle**, SocketIO feeds with token-based reconnect, in-app chat, payments, Live Activities, driver earnings & turn-by-turn navigation · Swift 6 strict concurrency. **800+ tests.**

Android Apps · Rider & Driver
Kotlin · Jetpack Compose · Sep '26 → now

Native **Kotlin / Compose** ports of both apps against the **same API contract**, on a shared **buraq-core-android** library published to GitHub Packages — driver KYC photo/liveness/OTP and trips; rider booking, live tracking, FCM push and Google Pay · **290+ test suites.**

One backend · one contract · four native clients in flight — plus growth tools (referrals, loyalty tiers, wallet), driver safety/SOS, and scheduled reconciliation jobs. The exercise a technical lead needs: parallelizing over many trade-off yourself, then know exactly what you are asking of a team.

Dec 2025 → Jun 2026 · VOLUNTEER

Senior iOS Engineer

HarambiTur ↗ · Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Engineered smart banner blocking and optimized memory management throughout.

Mar 2018 → May 2019 · RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App ↗

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 → Mar 2018 · KSA

Senior iOS Engineer

HungerStation — DeliveryHero Group ↗

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimization.
- Collaborated with backend teams on API design and integration.

May 2016 → Aug 2016

iOS Developer

Al-Nayash ↗

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Speedy payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 → Sep 2015

iOS & Apple Watch Developer

Nile Design Co. ↗

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

May 2014 → May 2015

iOS Developer

UK Pro. Solutions Ltd. ↗

- Developed e-commerce experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§03 Selected Projects

01 — FULL-STACK

Ride-Hailing Platform · Built from scratch · since Mar 2026

`NestJS` · `Prisma` · `PostgreSQL` · `Redis` · `Socket.IO` · `Next.js`

End-to-end ride-hailing platform architected solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, realtime sockets, 2,700+ tests) and a real-time Next.js operations console in **production**, with **four native clients** (Rider & Driver on iOS/SwiftUI and on Android/Kotlin/Compose).

- Four Platforms · Solo Ownership · Production Security

02 — ENTERPRISE

Marra — iPad POS

`SwiftUI` · `CoreData` · `CloudKit` · `Real-time Sync`

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

★ 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

`MapKit` · `Core Location` · `Apple Pay` · `Push` · `watchOS`

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users.

★ 4.7 / 5 — 311.8k+ ratings

04 — DELIVERY

HungerStation

`UIKit` · `Firebase` · `Real-time APIs` · `Performance Optimization`

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

★ 4.5 / 5 — 1.9M+ ratings

05 — 3D / PHOTO

HarambiTur — Privacy Browser

`SwiftUI` · `CoreML` · `WKWebView` · `CoreImage` · `Vision`

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

- AI-Powered Privacy Browser

06 — COMMUNITY

Dalcolo

`MapKit` · `Core Location` · `Social SDKs` · `Community`

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

★ 4.5 / 5 — 1,287 ratings

§04 Stack & Craft

ENGINEERING PRACTICE · CRAFT

System Design · Automated Testing · API Design · Offline-first & Sync · Real-time (WebSockets) · Performance Profiling · CI/CD · Code Review · Modular Codebases · Versioned SDKs · Mentoring · Agile / Scrum

CORE · 2015 → 2025

Swift 6.0 · SwiftPM · UIKit · Combine · async/await · SwiftData · iOS 18+

NATIVE · ANDROID → 2025

Kotlin · Jetpack Compose · Coroutines · Flow · MVVM

§07 Honours

01 Owned the architecture of a POS platform serving **20k+ restaurants** and cafés for **7 consecutive years** — through its growth from launch scale to enterprise.

02 Held a **99.8–99.9% crash-free rate** and cut app deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 Architecting a **full-stack ride-hailing platform solo** — NestJS/PostgreSQL backend and Next.js ops console in production, four native clients (rider and driver, iOS and Android) in development, with idempotent APIs and double-entry accounting.

04 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** published on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
