Ahmad Abdul-Jawad Mahmood

iOS Tech Lead / Team Lead / Founder & CTO, Buraq

// 12+ years architecting & shipping SwiftUI apps · Cairo → Riyadh · millions of users across MENA

12+	30+	35M+	20.5+
YEARS IN iOS	PROJECTS SHIPPED	USERS REACHED	RESTAURANTS · MARK

```
/**
 * Senior iOS Tech Lead with 12+ years architecting and shipping SwiftUI apps
 * used by millions across MENA. I lead iOS teams and set technical direction —
 * and since
 * March 2024 I am also Founder & CTO of Buraq (buraqegypt.com), an Egyptian
 * ride-hailing
 * platform built solo: iOS & Android apps, a NestJS / PostgreSQL / Redis
 * backend, ops console, web.
 */
```

experience() — 8 roles

IOS Team Lead @ Marn — Jahez Group — Aug 2019 → Aug 2020

RIYADH, KSA

- Lead and mentor an iOS team of **5+ developers** building enterprise POS solutions.
- Architect offline-first systems with CoreData + seamless cloud sync, serving **20k+ restaurants** and cafés.
- Design sophisticated table management, order processing, and inventory tracking systems.
- Spearhead the migration to SwiftUI and modern practices (Combine, async/await).
- Optimized performance for **40% faster load times** and a **99.8-99.9% crash-free** rate.
- Established CI/CD pipelines and automated testing, cutting deployment time by **40h**.

Founder & CTO — iOS · Android · Backend · Web @ Buraq — buraqegypt.com

Mar 2024 → Present · CURRENT

CAIRO · FOUNDER · BURAQ TECHNOLOGIES

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: chose the stack, set the standards, and built nine repositories from zero — **backend** (NestJS, PostgreSQL, Redis), **iOS and Android** apps as **120 and Android**, a shared core package per platform, and the public web app **Live at buraqegypt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI suite that gates the merge. Now preparing a cash-only launch in Greater Cairo.

Backend API — NestJS · TypeScript · Mar '24 → now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine** with **race-safe** transitions over a hand-rolled lock, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop rides, five realtime **Socket.IO gateways** namespaces, OTP / Apple / Google auth with RBAC, idempotency and audit log. **130+ endpoints** over 55 controllers, 62 entities, **3,900+ tests**. Swagger docs.

Ops Console — Next.js 14 · Ant Design · now

29-screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor**, surge, heatmap, and **Google SSO** — RBAC and Argon2 auth, 170+ tests.

iOS · Rider & Captain — SwiftUI · Swift 6 · Jan '24 → now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain, networking, design system, version-pinned) — the full **trip lifecycle** on live GPS, Socket.IO feeds with fresh-token reconnect, chat, wallet and payments, **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,000+ tests**, strict concurrency.

Android · Captain — Kotlin · Jetpack Compose · Aug '24 → now

Native port against **the same API contract** — 18 feature modules on convention plugins, Hilt, a pure-Kotlin domain, networking, the shift's foreground service and the trip end to end running against the backend · **1,500+ tests**.

Android · Rider — Kotlin · Jetpack Compose · Sep '24 → now

Screen-by-screen parity port of the iOS rider app — 13 feature modules on a published **buraq-core-android** (GitHub Packages) · **1,000+ tests**, including 211 screenshot goldens in light, dark and RTL.

Web · buraqegypt.com — Next.js 14 · React 19 · Oct '24 → now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages · Tailwind · English + Arabic (RTL), WCAG 2.2 AA, **1,000+ tests** · **Live on Render since 15 Oct 2026.**

One backend · one contract · six client surfaces — and the company around them: incorporation, the Law 151/2020 license, a private equity firm's first $5k observed fares, the business model and investor materials, the 3-year plan. 3,100+ commits, one author — so I know exactly what I will be asking of the team I hire.

Senior iOS Engineer @ KaramBlur — voluntary charity project — Dec 2020 → Jun 2026

- Designed an architecture integrating **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

IOS Team Lead @ Ego — Ride Hailing — Mar 2018 → May 2019

Riyadh, KSA

- Developed a ride-hailing ecosystem (iOS, watchOS) serving **150k+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer @ HungerStation — DeliveryHero — Sep 2016 → Mar 2018

Dxb

- Contributed to a major food-delivery platform serving **20M+ users**.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery notifications.
- Collaborated with backend teams on API design and integration.

iOS Developer @ AlKapadh — May 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer @ Nile Design Co. — Jul 2015 → Sep 2015

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

iOS Developer @ UK Pro. Solutions Ltd. — May 2014 → May 2015

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[] — selected

[01] ai / privacy

HaramBlur — Privacy Browser

SwiftUI · CoreML · MVVM+Use · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and blurring. On-device ML, smart blur, live video monitoring.

- AI-powered privacy browser

[02] full-stack

Buraq — Ride-Hailing

NestJS · TypeScript · PostgreSQL · Redis · SwiftUI · Swift 6 · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (Trip state machine, ozone disinfo, double-entry ledger, five realtime gateways, 7,900+ tests), a 29-screen ops console, rider and captain apps on iOS and Android, and the public web app live at buraqegypt.com.

- 4.7 / 5 — 211.8k+ ratings

[03] delivery

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants across Saudi Arabia. Offline-first architecture, complex table management, real-time orders.

- 4.8 / 5 — 2,437 ratings

[04] mobility

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · watchOS

Complete ride-hailing solution: rider, driver, and Apple Watch apps. Real-time GPS and cross-device experiences for 150k+ users.

- 4.7 / 5 — 311.8k+ ratings

[05] enterprise

Daleelo

MapKit · Core Location · Social SDKs

Mobile community app — prayer times, mosque finder, and community features with on-demand location + social integration.

- 4.5 / 5 — 1,287 ratings

[06] community

honours[]

01 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain.

02 Built a ride-hailing ecosystem serving **150k+ users** in Saudi Arabia.

03 **Founded Buraq** (buraqegypt.com). An Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app. Live since Oct 2026 — behind **19,000+ automated tests**.

04 Led a POS system serving **20k+ restaurants** and cafés.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ iOS projects** delivered across a 12-year career.

07 Early SwiftUI adopter (WWDC 2014) & early SwiftUI adopter (WWDC 2019).
