Technical lead with **12+ years** hands-on and **8+ leading** — the engineer a team's hardest problems land on. For seven years I owned the architecture at the enterprise POS used by 20k+ restaurants and cafés on offline-first CorePlus core with closed-loop, server-authoritative, the revolution but, and the multi-year Swiftlit migration kept it modern without production delivery. I lead by building — since March 2020 as **Founder & CTO of Buraq** (buraqsoft.com), an Egyptian ride-hailing platform I built **solo:** a NestJS / PostgreSQL / Redis backend, a 20-screen operations console, rider and captain apps on iOS and Android, and delivery commitments the team could keep.

12+ YEARS HANDS-ON

8+ LEADING ENGINEERING TEAMS

35M+ RIDERS ASSIGNED · APPS

30+ SERVICES DELIVERED

§ 01 How I Lead Technically

01 — ARCHITECTURE & DIRECTION

Own the shape of the system

Module boundaries, data models, and the build-vs-buy line. I write the first ADR, then I write the second one that argues with it. I build so a venue keeps trading when the network does not. Plus the **migration plans that keep a codebase current without stalling delivery**.

02 — MENTORING AT THE KEYBOARD

Lead by building alongside

Seven years mentoring a **5× engineer team** through pairing, code review, and RFCs that makes the next PR better. Technical direction lands faster when the lead is in the codebase too.

03 — STANDARDS IN CODE

The bar is a diff, not a document

Review culture, automated tests that gate merges, and CI/CD built from nothing **that lasted deployments**. The standards I wrote and enforced held the app at a **99.8–99.9% crash-free rate** in production.

04 — WHOLE-STACK DEPTH

Credible at every layer

Backend, web, iOS and Android — at Buraq I built and **every layer** myself: the backend, the operations dashboard over a Redis geo-index, the rider-delivery ledger, the native passenger apps, **2,700+ backend tests** and 10,000+ across the platform.

§ 02 Professional Experience

Aug 2019 → Aug 2026 · 7 years leading the iOS org
Riyadh, KSA

iOS Team Lead — Jahez Group

- **Led a 5-engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- **Owned the technical roadmap and architecture** as offline-first CoreData core with closed-loop sync as a venue-keeping trade when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — that held the app at a 99.8–99.9% crash-free rate in production.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery — and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60% and shipping every 2 weeks without breakage.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 → Present · 1 MONTH
Cairo · Founder

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqsoft.com · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried to **entire technical scope alone:** shape the stack, on the standards, and built eleven operations from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqsoft.com**. Every layer governed by explicit rules (dependency-cruiser, ESLint, Prettier), with **2,700+ backend tests** and 10,000+ across the platform. Now preparing a cash-only beta in Egypt.

Backend API
NestJS · TypeScript · Fastify · Node 20+ · nest

Ops Console
Next.js 14 · App Router · Tailwind · shadcn/ui

iOS — Rider & Captain
SwiftUI · MVVM · Combine · async/await · MapKit

Android — Captain
Kotlin · Jetpack Compose · Hilt · Retrofit · Coroutines

Android — Rider
Kotlin · Jetpack Compose · Google Maps SDK · Material 3

Web — buraqsoft.com
Next.js 14 · React 18 · Tailwind CSS · Framer Motion

i18n · Buraq Schools
TypeScript · Next.js · Node.js · Postgres

Dec 2025 → Jun 2026 · VOLUNTEER

Senior iOS Engineer — HarvestBuzz Charity Project

- Designed an architecture integrating on-device machine learning for real-time crop classification.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 → May 2019 · 1 YEAR 3 MONTHS
Riyadh, KSA

iOS Team Lead — Tap — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push notification services.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 → Mar 2018 · 1 YEAR 7 MONTHS
Giza

Senior iOS Engineer — HungerStation — Deliveryhero Group

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 → Aug 2016 · 4 MONTHS

iOS Developer — Al.kapesh

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 → Sep 2015 · 3 MONTHS

iOS & Apple Watch Developer — Nile Design Co. ↗

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift5 from WWDC 2019 onward.

May 2014 → May 2015 · 1 YEAR

iOS Developer — HR Pro. Solutions Ltd. ↗

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store delivery commitments.

§ 03 Selected Projects

01 — FULL STACK

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Next.js · React · Tailwind · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend with a real-time geo-indexed dispatch, double-entry ledger, five-realtime gateways, 2,700+ tests, a 29-screen ops console, rider and captain apps on iOS and Android, and the public web app **live at buraqsoft.com**.

- Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

- 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push Notifications

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS tracking and secure payments for 10M+ users.

- 4.7 / 5 — 23.8K+ ratings

04 — DELIVERY

HungerStation

SDUI · Firebase · Real-time APIs · Performance

Major food-delivery platform serving 20M+ users across multiple countries and cities. Focused on performance and real-time order tracking.

- 4.5 / 5 — 1.9M+ ratings

05 — PRIVACY

Haramdhur — Privacy Browser

SwiftUI · Combine · WKWebView · Content Blocker · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection. Running On-device ML, smart blur effects, and live video monitoring.

- #2 Powered Privacy Browser

06 — COMMUNITY

Dalecło

Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

- 4.5 / 5 — 1,287 ratings

§ 04 Stack & Craft

ENGINEERING LEADERSHIP — ORG

Team Leadership · Technical Direction · Architecture Governance · Technical Roadmap · Mentoring & Career Growth · Onboarding · Code Review Culture · Estimation & Planning · Cross-Functional Partnership · Quality & Crash Budgets · Release Management · Agile / Scrum

FOUNDER — COMPANY

Company Formation · Pricing & Unit Economics · Business Modelling · Investor Narrative · Ride-Hailing Licensing · Payments Vendors · Go-to-Market

I/O — CORE

Swift 5.9 · SwiftUI · UIKit · Combine · async/await · SwiftData · Core ML · Vision · ARKit · Dynamic Island · App Tracking

BACKEND & APIS — FULL-STACK

NestJS · TypeScript · PostgreSQL · TypeORM · Redis · JWT/OTP Auth · REST · GraphQL · Firebase · CloudKit · Socket.IO · Swagger/OpenAPI

TOOLING & AI — WORKFLOW

Xcode 15+ · Fastlane · TestFlight · Instruments · Git · Claude Code · Copilot · Cursor

LANGUAGES — NATIVE

Arabic — Native
English — Professional

§ 05 Record

EDUCATION

B.Sc. Information Systems

Computer Sciences College
Assyut University, Egypt · 2009-2013
GPA: 3.0 / 4.0 — Excellent (90.3%)

CERTIFICATIONS

ISTQB Foundation Level

Egyptian Software Testing Qualification Board

§ 06 Honours

01 — 2015
Led an iOS engineering team for **7 consecutive years** on a POS platform used by **20k+ restaurants** and cafés — through the product's growth from early stage to enterprise.

02 — 2017
Hold a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 — 2020
Founded Buraq (buraqsoft.com), an Egyptian ride-hailing platform, and built all eleven repositories solo — backend, ops console, rider and captain apps on iOS and Android, Buraq Schools, and the public web app, live since Oct 2026 — behind **10,000+ automated tests.**

04 — 2021
Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05 — 2022
10+ apps published on the App Store, used by millions across MENA.

06 — 2023
30+ projects delivered across a 12-year career.

07 — 2024
Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
