★ SEE THE LIVE INTERACTIVE EDITION ↗ · **★ BURAQ — BURAQSYPPT.COM ↗**

Senior software engineer with **12+ years** shipping production software — native iOS first, now across Android, backend and web. I have built apps used by **35M+ people** HungerStation, Ego ride-hailing, and for seven years the Marn POS used by 20k+ restaurants and cafés, where I owned an offline-first CoreData core with cloud sync and **99.8%** crash-free runs. Since March 2026 I am **Founder & CTO of Buraq** (buraqsyppt.com), an Egyptian ride-hailing platform I built end to end, **solo**: a NestJS / PostgreSQL / Redis backend, a 20-screen operations console, the public web app, and native iOS & Android apps on one API contract.

12+	35M+	99.8%+	10k+
YEARS HANDS-ON	ACTIVE RIDERS ACROSS SHIPPED APPS	CRASH-FREE RATE IN PRODUCTION	AUTOMATED TESTS ACROSS REPOS

§ 01 How I Engineer

01 — SYSTEMS DESIGN

Design for the failure case

An offline-first CoreData + cloud-sync core so a venue keeps trading when the network does not. A **trip state machine, second dispatch** on a Redis geo index and a **double-entry ledger** with idempotent mutations, so a retry can never double-charge.

02 — QUALITY YOU CAN MEASURE

Tests gate the merge

Automated tests that block bad merges, CI/CD built from nothing, **automated deploys**, and a **99.8%+ crash-free rate** in production. At Buraq: **2,950+ backend**, **1,000+ iOS** and **4,500+ Android** tests.

03 — SHIP WITHOUT STOMPING

Modernise in flight

A multi-year move to SwiftUI, Combine and async/await without pausing feature delivery, and a performance programme that cut load times **40%**, both at once and structured.

04 — CAN-TO-END OWNERSHIP

Credible at every layer

Native iOS (SwiftUI) and Android (Kotlin / Compose) clients on shared, versioned core libraries; NestJS / PostgreSQL / Redis backends; a NestJs console and the public web app. At Buraq I build and run **every layer myself**.

§ 02 Professional Experience

Aug 2019 – Aug 2026 · RIYADH, KSA

iOS Team Lead — 7 years leading the 100.org

Marn — Jahez Group ↗

- **Owned the architecture** of an enterprise POS used by 20k+ restaurants and cafés: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Designed the core systems** — table management, order processing and inventory — at the heart of the product.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery.
- **Held a 99.0–99.9% crash-free rate** in production through clear module boundaries, code review and automated test gate merges.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60%, and ran the performance programme that cut 40% faster load times.
- Led and mentored a **5+ engineer iOS team** for seven years, and partnered with product, design and backend on scope and estimates.

Mar 2026 – Present · CAIRO · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqsyppt.com ↗ · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: choose the stack, set the standards, and build nine repositories from empty — a backend hardened and operations console, rider and captain apps on **iOS and Android**, a shared core package for platform, and the public web app **live at buraqsyppt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI note that gates the merge. Now preparing a cash-only beta in Latia.

Backend API · NestJS · TypeScript · Mar '26 – now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, scored **waterfall dispatch** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop rides, live realtime. **Socket.IO gateways**, OTP / Apple / Google auth with RS4C, idempotency and audit log. **330+ endpoints** across 55 controllers, **2,950+ tests**, Swagger docs.

Ops Console · Next.js 16 · 2x1 '26 – now

29 screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor**, feature flags, audit log. **Google SSO** English and Arabic, 170+ tests.

iOS · Rider & Captain · SwiftUI · Swift 6 · Jul '26 – now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, zero-pinned) — the full **trip lifecycle** on live GPS, SocketIO fleets with **Dead Reckoning**, **Offline Queue**, **Live Activities**, Siri voice tracking, on-device ID verification, captain earnings and navigation · **240 views**, **1,000+ tests**, zero warnings.

Android · Captain · Kotlin · Jetpack Compose · Aug '26 – now

Native port against **the same API contract** — 16 feature modules on coroutines + Hilt, **Google Maps** driver navigation, **Firebase** push, **Google ML Kit** on-device ID verification, **Room** offline queue, **Play Integrity** attestation, **Crashlytics**, **Paparazzi** screenshot tests, **Fastlane** release lanes.

Android · Rider · Kotlin · Jetpack Compose · Sep '26 – now

Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** (GitHub Packages): **3,200+ tests**, including 371 screenshot goldens in light, dark and RTL.

Web · buraqsyppt.com · Next.2e '16 · Recent '19 · Oct '26 – now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 15 Oct 2026**.

One backend · one contract · six client surfaces — and the company around them. Documentation, the Law #17/2018 launch, a pricing engine fitted to 45 governorates, the business model and investor materials, the go-live plan. I know every piece, the author — so I know exactly what I will be asking of the team I hire.

Dec 2025 – Jun 2026 · VOLUNTEER

Senior iOS Engineer

HarambiTur ⟡ Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 – May 2019 · RIYADH, KSA

iOS Team Lead

Ego — Ride Hailing App ↗

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 – Mar 2018 · KSA

Senior iOS Engineer

HungerStation — Deliveryhero Group ↗

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 – Aug 2016

iOS Developer

AlAwadh ⟡

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 – Sep 2015

iOS & Apple Watch Developer

Nile Design Co. ⟡

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift from WWDC 2019 onward.

May 2014 – May 2015

iOS Developer

Dr.Pro, Solutions.Ltd ⟡

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.2e · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform: backend and solo web console, native iOS and Android rider and captain apps. **Second dispatch**, double-entry ledger, live realtime, 330+ endpoints, 2,950+ tests, a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqsyppt.com**.

★ Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, custom table management, real-time order processing — **the product my iOS team owned for seven years.**

★ 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

★ 4.7 / 5 — 211.8k ratings

04 — DELIVERY

HungerStation

GCD/X · Firebase · Real-time APIs · Performance

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

★ 4.5 / 5 — 1.94k ratings

05 — AI / PRIVACY

HarambiTur — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

★ AI-Powered Privacy Browser

06 — COMMUNITY

Daleelo

MapKit · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

★ 4.5 / 5 — 1,397 ratings

§ 04 Stack & Craft

ENGINEERING PRACTICE · CRAFT

System Design · Automated Testing · API Design · Offline-First & Sync · Realtime (WebSockets) · Performance Profiling · CI/CD · Code Review · Modular Codebases · Versioned SDKs · Mentoring · Agile / Scrum

IDE — 2025 · CORE

Swift 6.0 · SwiftUI · UIKit · Combine · async/await · SwiftData · iOS 18+

ANDROID — 2025 · NATIVE

Kotlin · Jetpack Compose · Coroutines · Flow · MVVM

ARCHITECTURE · PATTERNS

MVVM · VIPER · Clean Architecture · Coordinator · TDD

APPLE ECOSYSTEM · PLATFORMS

watchOS · tvOS · macOS · WidgetKit · Live Activities · App Intents

MODERN FEATURES · INTELLIGENCE

Core ML · Vision · ARKit · Dynamic Island

App Tracking

BACKEND & APIS · FULL-STACK

TypeScript · PostgreSQL · TypeORM · Redis · JWT/OTP Auth · REST · GraphQL · Firebase · CloudKit · Socket.IO · Swagger/OpenAPI

TOOLING & AI · WORKFLOW

Xcode 16+ · Fastlane · TestFlight · Instruments · Git · Claude Code · Copilot · Cursor

§ 07 Honours

01 — Owned the architecture of a POS platform serving **20k+ restaurants** and cafés for **7 consecutive years** — through its growth from launch to scale to enterprise.

02 — Held a **99.0–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 — **Founded Buraq** (buraqsyppt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **12,000+ automated tests**.

04 — Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05 — **10+ apps** published on the App Store, used by millions across MENA.

06 — **30+ projects** delivered across a 12-year career.

07 — Early SwiftUI adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
