Technical lead with **12+ years** hands-on and **8+ leading** — engineer a team's hardest problems and I'll grow yours. For seven years I owned the architecture of an enterprise POS used by 20k+ restaurants and cafés: an offline-first CoreData + cloud sync engine, the module boundaries, the review bar, and the multi-year Swift10 migration that kept it moving without pausing delivery. I lead by building — since March 2026 as **Founder & CTO of Buraq** (buraqsypt.com), an Egyptian ride-hailing platform I built **solo**: a NestJS / PostgreSQL / Redis backend, a 29-screen operations console, rider and captain apps on iOS and Android, and the public web app, live.

12+	8+	35M+	30+
YEARS LEADING ENGINEERING TEAMS	YEARS HANDS-ON	LINES OF CODE ACROSS SHIPPED APPS	FEATURES DELIVERED

§ 01 How I Lead Technically

01 — ARCHITECTURE & DIRECTION

Own the shape of the system

Module boundaries, data models, and the offline-first CoreData + cloud sync core of an enterprise POS — built so a venue keeps trading when the network does not. Plus the **migration plans that keep a codebase current without stalling delivery.**

02 — MENTORING AT THE KEYBOARD

Lead by building alongside

Seven years mentoring a **5× engineer team** through pairing, design review, and the kind of feedback that makes the next PR better. Standards and decisions land faster when the lead is in the codebase too.

03 — STANDARDS IN CODE

The bar is a diff, not a document

Review culture, automated tests that gate merges, and CI/CD built for **daily releases, not deployments.** The standards I wrote and enforced held the app at a **99.8–99.9% crash-free rate** in production.

04 — WHOLE-STACK DEPTH

Credible at every layer

Backend, web, iOS and Android — at Buraq I built and run **every layer** solo. Hands-on depth, scored dispatch over a Redis geo index, double-entry ledger, live realtime gateway, **2,700+ backend tests** and 10,000+ across the platform.

§ 02 Professional Experience

Aug 2019 — Aug 2026
KIWAN, KSA

iOS Team Lead — 7 years leading the iOS org

Kiwan — Sales Group

- **Led a 5× engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- **Owned the technical roadmap and architecture**: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — that held the app at a 99.8–99.9% crash-free rate in production.
- **Drove the multi-year migration** to Swift10, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme at 20k+ restaurants: launch time, memory footprint, and battery, owning the measurement systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 — Present
BURAQ

CAIRO · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqsypt.com ↗ · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: choose the stack, set the standards, and build nine repositories from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqsypt.com**. Every layer governed by explicit engineering standards, double-entry accounting, auditable module boundaries, and a CI suite that gates the merge. Now preparing a code-only beta test in Cairo.

Backend API
NestJS monolith, **32 modules** in an acyclic graph — **no circular imports, several extracted-ready** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with idempotent settlement and payouts, Firebase Cloud Messaging, a scheduled and event-driven job runtime, five realtime **Socket.IO gateways**, OTP / Apple / Google auth with RS6C, idempotency and audit log. **330+ endpoints** over 55 controllers, **62 entities**, **2,900+ tests**. Swagger docs.

Ops Console
29-screen ops surface — the **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, payouts, refunds and payouts, cash control, map **zone editor**. Nature flags, audit log. **Google SSO** · English and Arabic, 170+ keys.

iOS · Rider & Captain
SwiftPM · Swift 6 · Jun '26 → now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** and **in-app navigation** with finish-token reconnect, chat, wallet and payments. **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation · 240 views, **1,000+ tests**, strict concurrency.

Android · Captain
Native · Jetpack Compose · Aug '26 → now

Native port against the **same API contract** — 19 feature modules on coroutines and Hilt, a pure Kotlin domain, onboarding, the shift's foreground service and the trip and navigation flow. Foundation complete · **1,200+ tests**.

Android · Rider
Native · Jetpack Compose · Sep '26 → now

Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** library. Foundation complete · **2,200+ tests**, including 371 screenshot goldens in light, dark and RTL.

Web · buraqsypt.com
Next.js 16 · React 19 · Jul '26 → now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public tracking share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 16 Oct 2026.**

One backend · one contract · six client surfaces — and the company around them. Incorporated, the law 87/2018 licence path, a pricing engine fitted to the numbers, the business model and investor materials. I'm the first and only engineer — so I know exactly what I will be asking of the three I'll've.

Dec 2025 — Jun 2026
VOLUNTEER

Senior iOS Engineer

HarambEur — Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur algorithms.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

Mar 2018 — May 2019
KIWAN, KSA

iOS Team Lead

Egy — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 — Mar 2018
KIA

Senior iOS Engineer

HungerStation — Deliveryhero Group

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimized performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimization.
- Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016

iOS Developer

AlAqsadh

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 — Sep 2015

iOS & Apple Watch Developer

Nile Design Co.

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift10 from WWDC 2015 onward.

May 2014 — May 2015

iOS Developer

UK Pro. Solutions Ltd.

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Next.js · Swift · SwiftUI · MapLibre · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, live realtime gateways, 2,700+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqsypt.com.**

▸ Founder & CTO · Nine Repos · 10k+ Tests

02 — MOBILITY

Rapido — Ride Hailing

Rapido · Core CarePlus Alpha Pvt · Post · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

▸ 4.7 ⭐ 5 · 251.8k+ ratings

03 — AI / PRIVACY

HarambEur — Privacy Browser

SwiftUI · WebKit · Metal · CoreML · Vision

Privacy-focused iOS browser with real-time, AI-powered content analysis and filtering. On-device ML, smart blur effects, and live video monitoring.

▸ AI-Powered Privacy Browser

04 — ENTERPRISE

Marn — iPad POS

MarnPOS · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

▸ 4.8 / 5 ⭐ · 2,427 ratings

05 — ENTERPRISE

HungerStation

Swift · Firebase · Real-time APIs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

▸ 4.5 / 5 ⭐ · 1.9M+ ratings

06 — COMMUNITY

Daleelo

Maps · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

▸ 4.5 / 5 ⭐ · 1,287 ratings

§ 07 Honours

01. Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés — through the product's growth from startup to market leader.
02. Held a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.
03. **Founded Buraq** (buraqsypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **10,000+ automated tests.**
04. Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.
05. **10+ apps** published on the App Store, used by millions across MENA.
06. **30+ projects** delivered across a 12-year career.
07. Early Swift adopter (WWDC 2014) and early Swift10 adopter (WWDC 2019) — a habit of betting on the right platform shift early.
