Full-stack engineer who owns a feature from the database to the app on the phone. Since March 2026 I am **Founder & CTO of Buraq** (buraqegypt.com), an Egyptian ride-hailing platform I built **solo, across every layer**: a NestJS / TypeScript backend on PostgreSQL and Redis — **22 modules, 330+ endpoints, 2,000+ tests** — a 29-screen Next.js operations console, the public web app live at buraqegypt.com, realtime SocketIO feeds, payments, and native iOS & Android apps in Swift/SwiftUI and Kotlin/Jetpack Compose. Before that I ran **12+ years** of production engineering, seven of them owning the architecture of a POS used by 20k+ restaurants — so the APIs I design are the ones I would want to consume.

§ 01 Across the Stack

01 — BACKEND & DATA

Correct before clever

A NestJS modular monolith (**22 modules**) on PostgreSQL with versioned migrations. Redis for dispatch state, the driver geo index, rate limits and cron leases. A **double-entry ledger**, a transactional outbox and idempotency keys, so money and side effects survive retries.

02 — REALTIME & INTEGRATIONS

The parts that talk to the world

SocketIO gateways for riders, drivers and admins; Google Maps routing with ETA-aware fare quotes (surge, night, cancellation); Paymob cards, Apple Pay and Google Pay; WhatsApp-first OTP with SMS fallback; APNs and FCM push.

03 — WEB

An ops console people can run a business with

A **29-screen** Next.js 14 console: live MapLibre trips map, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, a map zone editor, feature flags, **RBAC** and an audit log behind SocketIO gateways.

04 — MOBILE CLIENTS

12 years of shipping apps

Native SwiftUI and Kotlin / Compose apps on shared, versioned core libraries, with **1,000+ iOS** and **4,000+ Android tests**. Before this apps used by **35M+ people** — HungerStation, Egy-Walk and the Mars POS.

§ 02 Professional Experience

Mar 2026 – Present
CURRENT
CAIRO · FOUNDER

Founder & CTO — Backend · Web · iOS · Android

Buraq — buraqegypt.com · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: choose the stack, set the standards, and build every surface from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqegypt.com**. Every layer governed by explicit rules idempotent mutations, double-entry accounting, explicit state machines, and a CI suite that gates the merge. Now preparing a cash-only loan beta in Cairo.

Backend API
NestJS · TypeScript · Mar 2026 → now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored waterfall dispatch** over a Redis geo index, **admin-configurable pricing** with zone factors, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop trips, realtime **SocketIO gateways**, OTP / Apple / Google auth with RBAC, idempotency and audit log. **330+ endpoints** over 55 controllers, **62 entities**, **2,900+ tests**, Swagger docs.

Ops Console
Next.js 14 · Oct '26 → now

29-screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash-remittance map **zone editor**, feature flags, push log. **Google SSO** English and Arabic, RTL-ready.

iOS · Rider & Captain
SwiftUI · Swift 6 · Jul '26 → now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** on live GPS, Socket.IO feeds with fresh-token reconnect, chat, wallet and payments, **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,000+ tests**, strict concurrency.

Android · Captain
Kotlin · Jetpack Compose · Mar '26 → now

Native port against **the same API contract** — 16 feature modules on convention plugins, Hilt, a pure-Kotlin domain, onboarding, the shift's foreground service and the trip end to end running against the backend · **1,000+ tests**.

Android · Rider
Kotlin · Jetpack Compose · Sep '26 → now

Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** (GitHub Packages) · **2,200+ tests**, including 371 screenshot goldens in light, dark and RTL.

Web · buraqegypt.com
Next.js 14 · React 19 · Oct '26 → now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip share page and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 16 Oct 2026.**

One backend · one contract · six client surfaces — and the company around it. Architecture, code, tests, CI, infra, product and ops — every decision mine, for six external teams. The business model and investor materials, the price list, 2,100+ commits, one author — so I know exactly what I'm asking of the team I hire.

Aug 2019 – Aug 2026
RIYADH, KSA

iOS Team Lead · 7 years leading the iOS org

Mars — Jahez Group

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with sync queue, built so a venue keeps trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — that held the app at a 99.6 %-crash-free rate in production.
- **Drove the multi-year migration** to SwiftUI. Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch,** cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and invoicing systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.

Dec 2025 – Jun 2026
VOLUNTEER

Senior iOS Engineer

HarvestRun — Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur algorithms.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 – May 2019
RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route calculations.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 – Mar 2018
KSA

Senior iOS Engineer

HungerStation — DeliveryHero Group

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 – Aug 2016

iOS Developer

AlAqwadh

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Specially payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 – Sep 2015

iOS & Apple Watch Developer

Nile Design Co.

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

May 2014 – May 2015

iOS Developer

UK Pro. Solutions Ltd.

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Next.js · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, five realtime gateways, 2,900+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqegypt.com.**

→ Founder & CTO · Nine Repos · 10k+ Tests

02 — MOBILE

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

↗ 4.7 / 5 — 211.8k+ ratings

03 — IOS / PRIVACY

Harmalibur — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

→ AI-Powered Privacy Browser

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

↗ 4.8 / 5 — 2,437 ratings

04 — DELIVERY

HungerStation

UIKit · Firebase · Real-time APIs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

↗ 4.5 / 5 — 1.9M+ ratings

03 — PRAYER

Daleela

MapKit · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

↗ 4.9 / 5 — 1,287 ratings

§ 04 Stack & Craft

WEB & INFRASTRUCTURE — FULL-STACK

`Next.js 14` `React` `TypeScript` `MapLibre` `Socket.IO` `Docker` `GitHub Actions CI` `Prometheus Metrics` `Jest` `Google Maps Platform` `Paymob` `Cloudflare R2`

CORE — DATA + SERVICES

`Swift 6.0` `SwiftUI` `UIKit` `Combine` `async/await` `SwiftData` `iOS 18+`

NATIVE — ANDROID + 2025

`Kotlin` `Jetpack Compose` `Coroutines` `Flow` `MVVM`

PATTERNS — ARCHITECTURE

`MVVM` `VIPER` `Clean Architecture` `Coordinator` `TDD`

PLATFORMS — APPLE ECOSYSTEM

`watchOS` `tvOS` `macOS` `WidgetKit`

INTELLIGENCE — MODERN FEATURES

`Live Activities` `App Intents` `Core ML` `Vision` `ARKit` `Dynamic Island` `App Tracking`

WORKFLOW — TOOLING & AI

`Xcode 15+` `FastLane` `TestFlight` `Instruments` `GIT` `Claude Code` `Copilot` `Cursor`

BACKEND & APIS — CORE

`NestJS` `TypeScript` `PostgreSQL` `TypeORM` `Redis` `JWT/OTP Auth` `REST` `GraphQL` `Firebase` `CloudKit` `Socket.IO` `Swagger/OpenAPI`

§ 07 Honours

02 Building **Buraq solo across every layer** — backend, ops console, web app, and iOS and Android apps on one API contract.

02 Held a **99.6 %-crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 **Founded Buraq** (buraqegypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **10,000+ automated tests.**

03 **Founded Buraq** (buraqegypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **10,000+ automated tests.**

04 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05 **10+ apps** published on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early SwiftUI adopter (WWDC 2014), and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
