Chief Technology Officer · 12+ years building, 8+ leading.
Seven of them running the iOS org behind a POS platform trusted by 20k+
restaurants and cafés — Cairo, technology strategy, architecture and roadmap, the
standards a team runs on, and the answer for delivery.
Since March 2026 I have also been running Buruu — part of a founder and CTO
stake at Buruu (buruuapp.com), an Egyptian ride-hailing platform I built
solo:
backend, 29-screen apps console, iOS & Android apps, and the public web app,
live.
So no layer of the stack is a black box when I am deciding for a company.

Choose the org, own the consequences

Stack, architecture and roadmap as one decision, not three. Hiring, reviews, standards, and the culture a team runs on — set on purpose, not by whoever started shipping the loudest.

Engineering function, not a headcount

Seven years building and leading a 5+ engineer function — hiring, reviews, and the standards a team runs on. Now applied to Buruu, part of a founder and CTO stake.

Commitments the company can plan around

CI/CD and release automation built from nothing, notes that gate merges, shutdown performance and reliability, planning the team can keep.

No layer is someone else's problem

Backend, web, iOS and Android — at Buruu I built it, and now I own all of it solo, and formed the company around it.

4 roles

LOS Team Lead @ Marn — Jahez Group

Aug 2019 → Aug 2026 · 7 yrs

- Led a 5+ engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture setting an enterprise POS used by 20k+ restaurants and cafés.
- Owned the technical roadmap and architecture; an offline-first CoreData core with cloud sync, built on a modular Swift package, running in production.
- Set the engineering standards — module boundaries, code review, automated testing — holding the App at ★ 4.7 from 4.2k reviews as production.
- Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery, and now the team I set to protect leadership.
- Built CI/CD and the release process from scratch, cutting deployment time 40% and shortening build engineers' feedback loop.
- Ran the performance programme (40% faster load times) and designed the table-management, order-processing and POS screens at the product's core.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments.
