SEE THE LIVE INTERACTIVE EDITION ↗ · **BURAQ — BURAQEGYPT.COM ↗**

A technologist who has owned every part of the job. **12+ years** building and **8+ leading** — from founding the iOS organisation behind a POS platform trusted by 20k+ restaurants and cafés, 2 net technology strategy, own architecture and the roadmap, built the standards an engineering team runs on, and answer for delivery. And since March 2021 I've been **technical co-founder of a founder and CTO alone at Buraq** (buraqegypt.com) an Egyptian ride-hailing platform I built solo — a NestJS / PostgreSQL / Redis backend, a 29-screen operations console, rider and captain apps on iOS and Android, and the public web app, live — plus the company around it. No layer of the stack, and no line of the business plan, is a black box to me when I am deciding for a company.

12+ YEARS IN ENGINEERING

8+ YEARS LEADING ENGINEERING TEAMS

35M+ REQUESTS ACROSS SHOPIFY'S APPS

20k+ RESTAURANTS AND CAFÉS BY THE POS I LED

§01 The Technology Office

01 — TECHNOLOGY STRATEGY

Choose the bets, own the consequences

Stack, architecture, and roadmap as a single decision platform choices, module boundaries, data models, security posture — and the migrations **that keep a codebase evolvable without blowing the business.** At Mixin that meant moving a seven-year-old production POS to SwiftUI, Combine and async/await while features kept shipping.

02 — ORGANISATION & TALENT

An engineering function, not a headcount

Seven years building and leading a **5+ engineer team** — onboarding, mentoring, career conversations, and a review culture where quality is the default rather than a phase. The literal test: I shipped the product at a **99.0-99.9% crash-free rate** under real enterprise load.

03 — DELIVERY & OPERATIONS

Commitments the company can plan around

CI/CD and release automation built from nothing **(iOS: fastlane deployments, code signing, TestFlight to Play Console)** — so releases stopped being all-hands events, **iOS: faster test times**, and shared libraries and design in commitments the team can actually keep.

04 — MIDDLE-STACK OWNERSHIP

No layer is someone else's problem

Backend, web, iOS and Android. At Buraq I built and ran **all of it solo** — the NestJS API, monitoring, observability, disaster-recovery, failover, payments, gateways, 5,700+ backend tests and 10,000+ across the platform — and formed the company around it, so I can cost a technical decision before the company pays for it.

§02 Professional Experience

Aug 2019 – Aug 2026
RIYADH, KSA

iOS Team Lead · 7 years leading the iOS org

Mixin — Jahez Group

- **Led a 5+ engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Set the engineering standards** — modules, boundaries, code review, automated testing — that held the app at a 99.0-99.9% crash-free rate at production scale.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and the release process from scratch,** cutting deployment time 60% and shortening every engineer's feedback loop.
- **Ran the performance programme** (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 – Present
RIYADH, KSA
CURRENT · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqegypt.com — Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone:** chose the stack, set the standards, and built and shipped every line from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android,** a shared ride package per platform, and the public web app **live at buraqegypt.com.** Every layer governed by explicit rules (idempotent mutations, a double-entry accounting, acyclic module boundaries, and a CI suite that gates the merge). Now preparing a cash-only beta in Luxor.

Backend API
NestJS · TypeScript · Node 20 · Fastify

Modular monolith, 22 modules in an acyclic graph — **trip state machine, scored waterfall dispatch** over a Redis geo index, admin-tunable pricing zones as rule-tree data, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and recurring trips, and a real-time **Socket.IO gateway,** OTP / Apple / Google auth with RBAC, idempotency and audit log. **330+ endpoints** over 55 controllers, 62 entities, **5,700+ tests.** Swagger docs.

Ops Console
Next.js 14 · App Router · Tailwind

29-screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor,** feature flags, **audit log. Google SSO** · English and Arabic, 170+ tests.

iOS · Rider & Captain
SwiftUI · Swift 5.9 · Zero 3rd-party

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — **MapLibre** navigation, **Socket.IO** live trip and chat, **Keychain**-secured tokens, **Arabic-first** RTL, **Apple Sign-In** auth, **Live Activities.** Dirt-wise booking, on-device ID verification, captain earnings and navigation — 240 views, **1,800+ tests,** strict concurrency.

Android · Captain
Kotlin · Jetpack Compose · Hilt

Native port against the **same API contract** — 18 feature modules on convention plugins, Hilt, a pure Kotlin domain, **MapLibre** with the OTA fonts-override, and the trip end-to-end running against the backend · **1,200+ tests.**

Android · Rider
Kotlin · Jetpack Compose · Hilt

Screen-by-screen parity port of the iOS rider app — 11 feature modules on a publishable **buraq-core-android** (Paymob gateway). **3,200+ tests,** including 371 screenshot goldens in light, dark and RTL.

Web · buraqegypt.com
Next.js 14 · React 18 · Zero 3rd-party

Marketing site, **rider web app** with live trip tracking, **live matching portal** with a real-time dispatch board (OCR, plate-to-vehicle) and captain app intro · English and Arabic (RTL), WCAG 2.2 AA. **1,000+ tests · live on Render since 15 Oct 2026.**

One backend · one contract · six client surfaces · and the company around it. Everything here is mine — and I'm looking for the people who want to help ship the next one. The business model and investor memo are in my head, the pitch deck is in progress, and the live product is open. Let's talk.

Dec 2025 – Jun 2026
VOLUNTEER

Senior iOS Engineer

Ramadhan Charity Project — Volunteer

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 – May 2019
RIYADH, KSA

iOS Team Lead

Tec — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 – Mar 2018
KSA

Senior iOS Engineer

Hungerstation — Deliveroo Group

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 – Aug 2016

iOS Developer

Al Nayesh

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 – Sep 2019

iOS & Apple Watch Developer

Nile Design Co.

- Early adopter of Apple Watch development (watchOS 1–2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift4 from WWDC 2019 onward.

May 2014 – May 2015

iOS Developer

GK Pro Solutions Ltd.

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce applications.
- Learned core iOS principles and App Store deployment.

§03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · Postgres16 · Redis · Socket.IO · Next.js · MapLibre · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (330+ endpoints, scored dispatch, double-entry ledger, five-realtime gateways), 2,900+ tests, a 29-screen ops console, and rider and captain apps on **iOS and Android,** and the public web app **live at buraqegypt.com.**

• Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · Combine · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, comprehensive testing, and real-time order processing — **the product my iOS team owned for seven years.**

• 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push notifs

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users.

• 4.7 / 5 — 23.8K+ ratings

04 — DELIVERY

HungerStation

UIKit · Firebase · Real-time APIs · Push notifications

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

• 4.5 / 5 — 1.9M+ ratings

05 — AI / PRIVACY

HaramBlur — Privacy Browser

SwiftUI · CoreML · Vision · Computer Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. Device ML, smart blur effects, and live video monitoring.

• AI-Powered Privacy Browser

06 — COMMUNITY

Dalcelo

Mobile Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

• 4.5 / 5 — 1,287 ratings

§04 Stack & Craft

ENGINEERING LEADERSHIP
Team Leadership · Technical Direction · Architecture Governance · Technical Roadmap · Mentoring & Career Growth · Onboarding · Code Review Culture · Estimation & Planning · Cross-Functional Partnership · Quality & Crash Budgets · Release Management · Agile / Scrum

FOUNDER
Company Formation · Pricing & Unit Economics · Business Modelling · Investor Materials · Ride-Hailing Licensing · Payments Vendors · Go-to-Market

ORG

DBS — 2009

CORE
Swift 5.0 · Swift6 · UIKit · Combine · async/await · SwiftData · iOS 18+

ARCHITECTURE & PATTERNS
SwiftUI · Jetpack Compose · Coroutines · Flow · MVVM · MVVM · VIPER · Clean Architecture · Coordinator · TDD

APPLE ECOSYSTEM
watchOS · tvOS · macOS · Widgetkit · Live Activities · App Intents

PLATFORMS

MODERN FEATURES
Core ML · Vision · ARKit · Dynamic Island · App Tracking

INTELLIGENCE

BACKEND & APIS
NestJS · TypeScript · PostgreSQL · TypeORM · Redis · JWT/OTP Auth · REST · GraphQL · Firebase · CloudKit · Socket.IO · Swagger/OpenAPI

FULL-STACK

TOOLING & AI
Xcode 15+ · Fastlane · TestFlight · Instruments · Git · Claude Code · Copilot · Cursor

WORKFLOW

§05 Record

EDUCATION

B.Sc. Information Systems

Computer Science, College
Ained University, Egypt · 2010-2013
GPA Semester · Excellent (90.18)

CERTIFICATIONS

ISTQB Foundation Level

Egyptian Software Testing Qualification Board

LANGUAGES

Arabic — Native
English — Professional

§07 Honours

01
Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés — through the product's scale, stability and shift to cloud-first.

02
Held a **99.0-99.9% crash-free rate** and cut deployment time **60%** by building the release tools and CI/CD the team ran on.

03
Founded Buraq (buraqegypt.com), an Egyptian ride-hailing platform, and built all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2026 — behind **12,000+ automated tests.**

04
Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05
10+ apps published on the App Store, used by millions across MENA.

06
30+ projects delivered across a 12-year career.

07
Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
