Ahmad Abdul-Jawad Mahmood

Founder & CTO, Buraq / Founding Engineer / Technical Lead

// 12+ years building · 8+ leading teams · Cairo → Riyadh · millions of users across MENA

12+	9	10	05
YEARS OF EXPERIENCE	PEOPLE BY ONE AUTHOR	BUSINESS THE PLATFORM	CURRENTLY ON THE PUB & LAB

/*
  Founder & CTO, Buraq — I founded it and built it myself.
  Since March 2024: an Egyptian ride-hailing platform (buraqexpert.com) — a
  Node.js /
  PostgreSQL / Redis backend, a 29-screen ops console, rider and captain apps on
  iOS
  and Android, and the public web app, live. 3,500+ commits across nine repos,
  all mine.
  Around the code: formed the company, priced the product from 62k observed
  trips,
  wrote the business model and the go-live plan.
  Before that: 10+ years on the code leading the 5+ engineer team
  behind a PSG platform used by 20k+ restaurants — so I build for the day the
  second engineer arrives.
*/

zero_to_one()

// 2011 once from nothing · 2021 found the company

Empty reqs to launch-ready platform

The first version and to-end — data models, API contracts, auth, deploy. At Buraq: a 22-module backend (trip state machine, scored waterfall dispatch, append-only ledger, five realtime gateways, 330+ endpoints), from empty repo to live.

Decide what nobody else can decide

Owned the architecture, the 07/2024 license, and set the fares from a 62k-ride field study. Buraq's incumbents — each decision run through the 3-layer framework, where it stopped as a founder.

2.7M+ backend code before a second engineer

It stood up — so can take it over

Idempotent mutations, ecotlc boundaries, migrations as the only schema path, a CI that runs them. Any engineer can read a route, a controller package per client — written while still the only engineer.

15 fitted competitor rate cards · 20% commission

the difference between a prototype and something we can hire into

I have done the other half too

Seven years leading a 5+ engineer US team — onboarding, mentoring, review culture, CI/CD.

99.9-99.9% crash-free in production

Founder & CTO → iOS / Android / Backend / Web — Buraq — buraqexpert.com

Mar 2024 → Present · CURRENT

CAIRO · REMOTE · EGYPT (TRAVELS)

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: shape the stack, set the standards, and built nine repositories from scratch — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package for platform, and the public web app **Live at buraqexpert.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, mystic module boundaries, and a CI suite that gates the merge. Now preparing a launch in Egypt's largest city.

- Backend API
  Node.js · TypeScript · Express · Zod
  Mar 2024 → Present
- Ops Console
  React 19.2+ · Vite · TailwindCSS
  Mar 2024 → Present
- iOS — Rider & Captain
  Swift 6 · SwiftUI · Swift Package Manager
  Mar 2024 → Present
- Android — Captain
  Kotlin · Jetpack Compose
  Aug '24 → Now
- Android — Rider
  Kotlin · Jetpack Compose
  Dec '24 → Now
- Web — buraqexpert.com
  Next.js · Tailwind CSS · Framer Motion
  Mar 2024 → Present

Backend — API gateway, **five realtime** gateways, **330+ endpoints** over 55 controllers, 42 entities, **3,500+ tests**.

Ops Console — live operations map, **Realtime** trips and driver tracking, dispatch and SOS boards, KYC review, finance reconciliation, reviews and payouts, users, control, **zone editor**, feature flags, audit log. **Google SSO** — English and Arabic, 24hr hours.

iOS — Rider & Captain — Two native **SwiftUI** apps on a **shared** Xcodeproj schemas — networking, design system, session-pinned) — the **fully bilingual** app, **Live** in the App Store. Built from token-resistant, etat, wallet and payments, **Live Activities** for ride tracking, **Apple Sign In**, **Apple Pay**, captain earnings and navigation — **3,000+ tests**. **Offline-first**.

Android — Captain — Native port against **the same API contract** — 18 feature modules on conversation engine, MVVM, a pure-Kotlin domain; onboarding, the wallet's Fawryquest service and the trip end to end running against the backend — **1,500+ tests**.

Android — Rider — Screen-by-screen parity port of the iOS rider app — 13 feature modules on a **shared** **buraq-core-android** (Kotlin Packages). **2,200+ tests**, including 351 screenshot goldens in light, dark and RTL.

Web — buraqexpert.com — Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, partner-driver fleet management, and a full admin console. Next.js 16.2, RCAG 2.2 AA, **3,500+ tests** · **live on Bandsor since 15 Oct 2024**.

Marketing site, rider web app with live trip tracking, **captain onboarding portal** with on-device document OCR, partner-driver fleet management, and a full admin console. Next.js 16.2, RCAG 2.2 AA, **3,500+ tests** · **live on Bandsor since 15 Oct 2024**.

LOS Team Lead — Maro — Jahez Group

Aug 2019 → Aug 2020

- **Led a 5+ engineer LOS team** for over **2 years** — onboarding, mentoring, career growth — and the review culture behind an enterprise POS used by **20k+ restaurants** across the platform.
- **Owned the technical roadmap and architecture** as offline-first CloudSync core with client-side time, built on a vendor-lock trading when the network does not.
- **Led the migration** from a monolithic Laravel app to a modular, event-driven backend — shipping the app at **99.5-99.9% crash-free** rate in production.
- **Drove the technical decisions** behind the **Maro Pro** tablet app — a purpose-built POS, payments, inventory, and kds that came for it to product leadership.
- **Built CI/CD** and **Docker** deployment, cutting deployment time **60%** and shortening every engineer's feedback loop.
- Ran the **on-premise** deployment model and **synchronization** for restaurants running fixture delivery, and made the case for it to product leadership.
- **Built CI/CD** and **Docker** deployment, cutting deployment time **60%** and shortening every engineer's feedback loop.

Senior iOS Engineer — HarvardSur — voluntary charity project

Dec 2025 → Jun 2026

- Designed an architecture interpreting **on-device machine learning** for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented a custom video processing with region-based and all-body blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimized memory management throughout.

LOS Team Lead — Ego — Ride Hailing

Mar 2018 → May 2019

Driving, Cairo

- Developed a ride-hailing ecosystem (iOS, android) serving **15M+ users** in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimized route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Senior iOS Engineer — HungerStation — DeliveryHero

Sep 2016 → Mar 2018

- Contributed to a major food-delivery platform serving **20M+ users**.
- Optimized app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimization.
- Collaborated with backend teams on API design and integration.

iOS Developer — AlAqeedh

Mar 2016 → Aug 2016

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spotlight search and time-slot functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

iOS & Apple Watch Developer — Nile Design Co.

Jul 2015 → Sep 2015

- Early adopter of Watch development (watchOS 1-2).
- Built a Foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

iOS Developer — 1M Pro. Solutions Ltd.

May 2014 → May 2015

- Developed iOS experiences in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

projects[]

4 projects

MarenPOS — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreGeoip · Vision

Enterprise POS browser with real-time content analysis.

- Custom WKWebView engine with real-time content monitoring and filtering. On-device ML, smart blur, live video monitoring.
- **AI-powered privacy browser**

Maro — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise POS serving 20k+ restaurants with offline-first CloudSync architecture, custom table management, real-time orders.

- **4.9 / 5 — 2,437 ratings**

HungerStation

VIPER · Firebase · Real-time APIs · Perf

Major food-delivery platform with 20M+ users across Saudi Arabia and Bahrain. Performance optimization, real-time order tracking.

- **4.5 / 5 — 1.8M+ ratings**

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · watchOS

Ride-hailing ecosystem (iOS, android) serving 15M+ users in Saudi Arabia. Real-time GPS tracking, navigation, and Apple Watch integration.

- **4.7 / 5 — 211.8k+ ratings**

Zeleria

SwiftUI · Core Location · Social SDKs

Mobile community app — prayer times, Qibla compass, and location-based features to connect Salaatee's Medical Corporation.

- **4.9 / 5 — 1,287 ratings**

honours[]

01 Led an iOS engineering team for **7 consecutive** years on a PSG platform serving **20k+ restaurants** and safes.

02 Held a **99.9-99.9% crash-free** rate in production, with release time **60%** with 550 students tests and CI/CD the team run on.

03 Founded Buraq (buraqexpert.com), an Egyptian ride-hailing platform scaffolding all nine repositories solo — backend, ops console, rider and captain apps on iOS and Android, and the public web app, live since Oct 2024 — before **15,000+ automated tests**.

04 Built a food-delivery platform serving **20M+ users** and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) & early AppKit adopter (WWDC 2015).
