◆ BURAQ — BURAQEGYPT.COM ↗

Senior software engineer with **12+ years** shipping production software — native iOS first, now across Android, backend and web. I have built apps used by 35M+ people: HungerStation, Ego ride-hailing, and for seven years the Marn POS used by 20k+ restaurants and cafés, where I owned an offline-first CoreData core with cloud sync and held a **99.8–99.9% crash-free** rate. Since March 2026 I am **Founder & CTO of Buraq** (buraqegypt.com), an Egyptian ride-hailing platform I built end to end, **solo**: a NestJS / PostgreSQL / Redis backend, a 29-screen operations console, the public web app, and native iOS & Android apps on one API contract.

12+	35M+	99.8%+	10k+
YEARS HANDS-ON	USERS REACHED ACROSS SHIPPED APPS	CRASH-FREE RATE IN PRODUCTION	AUTOMATED TESTS ACROSS BURAQ

§ 01 How I Engineer

01 — SYSTEMS DESIGN

Design for the failure case

An offline-first CoreData + cloud-sync core so a venue keeps trading when the network does not. A **trip state machine**, **scored dispatch** over a Redis geo index and a **double-entry ledger** with idempotent mutations, so a retry can never double-charge.

02 — QUALITY YOU CAN MEASURE

Tests gate the merge

Automated tests that block bad merges, CI/CD built from nothing (**60% faster deployments**), and a **99.8–99.9% crash-free rate** in production. At Buraq: **2,900+ backend**, **1,000+ iOS** and **4,000+ Android** tests.

03 — SHIP WITHOUT STOPPING

Modernise in flight

A multi-year move to SwiftUI, Combine and async/await without pausing feature delivery, and a performance programme that cut load times **40%**. Swift 6 strict concurrency, actors and structured concurrency in new code.

04 — END-TO-END OWNERSHIP

Credible at every layer

Native iOS (SwiftUI) and Android (Kotlin / Compose) clients on shared, versioned core libraries; NestJS / PostgreSQL / Redis backends; a Next.js console and the public web app. At Buraq I build and run **every layer myself**.

§ 02 Professional Experience

Aug 2019 — Aug 2026
RIYADH, KSA

iOS Team Lead — 7 years leading the iOS org

Marn — Jahez Group ↗

- **Owned the architecture** of an enterprise POS used by 20k+ restaurants and cafés: an offline-first CoreData core with cloud sync, built so a venue keeps trading when the network does not.
- **Designed the core systems** — table management, order processing and inventory — at the heart of the product.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery.
- **Held a 99.8–99.9% crash-free rate** in production through clear module boundaries, code review and automated tests that gate merges.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60%, and ran the performance programme behind 40% faster load times.
- Led and mentored a **5+ engineer iOS team** for seven years, and partnered with product, design and backend on scope and estimates.

Mar 2026 — Present
CURRENT
CAIRO · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqegypt.com ↗ · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: chose the stack, set the standards, and built eleven repositories from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqegypt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, acyclic module boundaries, and a CI suite that gates the merge. Now preparing a cash-only lean beta in Cairo.

Backend API NestJS · TypeScript · Mar ’26 → now	Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored waterfall dispatch** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop rides, five realtime **Socket.IO gateways**, OTP / Apple / Google auth with RBAC, idempotency and audit log · **330+ endpoints** over 55 controllers, 62 entities, **2,900+ tests**, Swagger docs.
Ops Console Next.js 14 · Jul ’26 → now	**29-screen** ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, refunds and payouts, cash control, map **zone editor**, feature flags, audit log, **Google SSO** · English and Arabic, 170+ tests.
iOS · Rider & Captain SwiftUI · Swift 6 · Jul ’26 → now	Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** on live GPS, Socket.IO feeds with fresh-token reconnect, chat, wallet and payments, **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation · ~240 views, **1,000+ tests**, strict concurrency.
Android · Captain Kotlin · Jetpack Compose · Aug ’26 → now	Native port against **the same API contract** — 18 feature modules on convention plugins, Hilt, a pure-Kotlin domain; onboarding, the shift's foreground service and the trip end to end running against the backend · **1,500+ tests**.
Android · Rider Kotlin · Jetpack Compose · Sep ’26 → now	Screen-by-screen parity port of the iOS rider app — 11 feature modules on a published **buraq-core-android** (GitHub Packages) · **2,200+ tests**, including 371 screenshot goldens in light, dark and RTL.
Web · buraqegypt.com Next.js 16 · React 19 · Oct ’26 → now	Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests** · **live on Render since 15 Oct 2026**.
iOS · Buraq Schools SwiftUI · Swift 6 · Nov ’26 → now	A second product on the same platform: **one app for parents and school-bus supervisors** — the live bus, safe handovers, an offline trip mode and an **iOS 26 Liquid Glass** interface · **1,000+ tests**; the Android port is under way.

One backend · one contract · eight client surfaces — and the company around them: incorporation, the Law 87/2018 licence path, a pricing engine fitted to 626 observed fares, the business model and investor materials, the go-live plan. 3,100+ commits, one author — so I know exactly what I will be asking of the team I hire.

Dec 2025 — Jun 2026
VOLUNTEER

Senior iOS Engineer

HaramBlur ↗ · Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 — May 2019
RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App ↗

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 15M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ⟷ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 — Mar 2018
KSA

Senior iOS Engineer

HungerStation — DeliveryHero Group ↗

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

May 2016 — Aug 2016

iOS Developer

ALNapedh ↗

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spreedly payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 — Sep 2015

iOS & Apple Watch Developer

Nile Design Co. ↗

- Early adopter of Apple Watch development (watchOS 1–2).
- Built a foundation in iOS and watchOS app development.
- Adopted SwiftUI from WWDC 2019 onward.

May 2014 — May 2015

iOS Developer

UK Pro. Solutions Ltd. ↗

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing (founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, five realtime gateways, 2,900+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqegypt.com**.

◆ Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years**.

★ 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 15M+ users.

★ 4.7 / 5 — 211.8k+ ratings

04 — DELIVERY

HungerStation

UIKit · Firebase · Real-time APIs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

★ 4.5 / 5 — 1.9M+ ratings

05 — AI / PRIVACY

HaramBlur — Privacy Browser

SwiftUI · CoreML · WKWebView · CoreImage · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

◆ AI-Powered Privacy Browser

06 — COMMUNITY

Daleelo

MapKit · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

★ 4.5 / 5 — 1,287 ratings

§ 04 Stack & Craft

ENGINEERING PRACTICE — CRAFT

- System Design
- Automated Testing
- API Design
- Offline-first & Sync
- Realtime (WebSockets)
- Performance Profiling
- CI/CD
- Code Review
- Modular Codebases
- Versioned SDKs
- Mentoring
- Agile / Scrum

IOS — 2025 — CORE

- Swift 6.0
- SwiftUI
- UIKit
- Combine
- async/await
- SwiftData
- iOS 18+

ANDROID — 2025 — NATIVE

- Kotlin
- Jetpack Compose
- Coroutines
- Flow
- MVVM

ARCHITECTURE — PATTERNS

- MVVM
- VIPER
- Clean Architecture
- Coordinator
- TDD

APPLE ECOSYSTEM — PLATFORMS

- watchOS
- tvOS
- macOS
- WidgetKit
- Live Activities
- App Intents

MODERN FEATURES — INTELLIGENCE

- Core ML
- Vision
- ARKit
- Dynamic Island
- App Tracking

BACKEND & APIS — FULL-STACK

- NestJS
- TypeScript
- PostgreSQL
- TypeORM
- Redis
- JWT/OTP Auth
- REST
- GraphQL
- Firebase
- CloudKit
- Socket.IO
- Swagger/OpenAPI

TOOLING & AI — WORKFLOW

- Xcode 15+
- Fastlane
- TestFlight
- Instruments
- Git
- Claude Code
- Copilot
- Cursor

§ 05 Portfolio Index

FOOD & GAMING

HungerStation — delivery
Punters — racing tips

Arabic	Native
English	Professional

§ 07 Honours

01 Owned the architecture of a POS platform serving **20k+ restaurants** and cafés for **7 consecutive years** — through its growth from launch scale to enterprise.

02 Held a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 **Founded Buraq** (buraqegypt.com), an Egyptian ride-hailing platform, and built all eleven repositories solo — backend, ops console, rider and captain apps on iOS and Android, Buraq Schools, and the public web app, live since Oct 2026 — behind **10,000+ automated tests**.

04 Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **15M+ users** in Saudi Arabia.

05 **10+ apps** published on the App Store, used by millions across MENA.

06 **30+ projects** delivered across a 12-year career.

07 Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.

SENIOR SOFTWARE ENGINEER · FOUNDER & CTO, BURAQ · 12+ YEARS HANDS-ON
