→ SEE THE LIVE INTERACTIVE EDITION ↗ · BURAQ — BURAQSYSOFT.COM ↗

A technologist who has owned every layer of the job. **12+ years** building and **8+ leading** — seven of them running the KSA organisation behind a POS platform trusted by **20k+ restaurants and cafés**. I set technology strategy, own architecture and the roadmap, build the standards an engineering team runs on, and ship code when it matters. Most recently I was running a seven-year-old production POS for SwiftOS, Combine and engineering platform for Integrated Apps.

Today I'm open to a new challenge. I'm looking for a **founder and CTO alone** at **Buraq** (buraqsyspot.com): an Egyptian ride-hailing platform I built — as a Node.js PostgreSQL / Redis backend, a 25-person store operations console, rider and captain apps on iOS and Android, and the public web app, live — plus the company around it. No layer of the stack, and no line of the business plan, is a black box to me when I am deciding for a company.

12+	8+	35M+	20k+
YEARS IN ENGINEERING	YEARS LEADING ENGINEERING TEAMS	ORDERS PROCESSED GLOBALLY, DISPATCH APPS	RESTAURANTS AND CAFÉS RUNNING MY POS LIVE

§01 The Technology Office

01 — TECHNOLOGY STRATEGY

Choose the bets, own the consequences

Stack, architecture, and roadmap as a single decision platform choices, module boundaries, data models, security posture — and the **migration plans that keep a codebase current without stalling the business.** At Nafis that meant running a seven-year-old production POS to SwiftOS, Combine and engineering platform Integrated Apps.

02 — DELIVERY & OPERATIONS

Commitments the company can actually keep

CI/CD and release automation built from nothing (**60% faster deployments**), test suites that gate merges, explicit performance and reliability targets (**40% faster load times**), and planning with product and design in commitments the team can actually keep.

03 — ORGANISATION & TALENT

An engineering function, not a headcount

Seven years building and leading a **6× engineer team** — onboarding, mentoring, career conversations, and the hiring calls where poor quality is the most expensive to get from a place. The standards I set held the product at a **99.8–99.9% crash-free rate** under real enterprise load.

04 — MOBILE-STACK ARBITRAGE

No layer is somehow else's problem

Backend, web, iOS and Android. At Buraq I built and **ran all 4 in solo** — trip state machine, scored dispatch, double-entry ledger, the realtime gateways, 2,900+ backend tests and 10,000+ across the platform — and formed the company around it, so I can cost a technical decision before the company pays for it.

§02 Professional Experience

Aug 2019 – Aug 2026 · 6Y 12M · KSA

iOS Team Lead · 7 years leading the iOS org

Nafis — Jatex Group

- **Led a 6× engineer iOS team** for seven years — onboarding, mentoring, career growth, and the review culture and standards that kept a codebase current without stalling the business.
- **Owned the technical roadmap and architecture:** an offline-first CoreData core with cloud sync, built as a venue-keeps-trading when the network does not.
- **Set the engineering standards** — module boundaries, code review, automated testing — that held the app at a 99.8–99.9% crash-free rate in production.
- **Drove the multi-app migration** to SwiftUI, Combine and async/await without pausing feature delivery, and made the case for it to product leadership.
- **Built CI/CD and release automation from scratch,** cutting deployment time 60% and shortening every engineer's feedback loop.
- Ran the performance programme (40% faster load times) and designed the tablet-first operations console, the reporting and inventory systems at the heart of the product.
- Partnered with product, design and backend leadership on scope, estimates, and delivery commitments the team could keep.

Mar 2016 – Present · 9Y 6M · KSA

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqsyspot.com

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone:** chose the stack, set the standards, and built eleven repositories from empty — the backend and dashboard and operations console, rider and captain apps on **iOS and Android**, a shared core package for platform, and the public web app **live at buraqsyspot.com.** Every layer governed by written standards and enforced by code review, automated testing, security-module boundaries, and a CI suite that gates the merge. Now preparing a cash-ride launch in Cairo.

Backend API
Node.js · TypeScript · Express · Socket.IO · PostgreSQL · Redis · BullMQ · Docker · Nginx · Prometheus · Grafana

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, scored **weighted dispatch** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash and card settlement (Paymob, Fawry), scheduled and multi-stop rides, the realtime **Socket.IO gateways**, OTP / Apple / Google auth with RBAC, idempotency and audit log. **2,900+ endpoints** over 86 controllers, 62 entities, **2,900+ tests**, lineager docs.

Ops Console
React 19 · Vite · Tailwind · shadcn/ui · TanStack Query · Zustand · Socket.IO client · Recharts · Leaflet · react-i18next

29 screens ops surface — live **MapLibre** trips map with zoned territories, dispatch and KYC queues, RTL/i18n review, finance reconciliation, refunds and payouts, cash control, **new zone editor**, feature flags, audit log. **Google SSO** · English and Arabic, 1154 tests.

iOS — Rider & Captain
SwiftUI · Swift 5.9 · Combine · async/await · MapLibre · Socket.IO · Keychain · Xcode 15 · iOS 16+

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **lifecycle** on the iOS 16+ target: OTP auth with Keychain-backed refresh, chat, wallet, ratings, **Live Activities**, Siri voice booking, on-device ID verification, captain document capture and KYC. **~240 views, 1,000+ tests**, strict concurrency.

Android · Captain
Native port against **the same API contract** — 18 feature modules on convention plugins, 1,100+ tests, shared-domain onboarding, the shift's foreground service and the trip end to end running against the backend. **1,100+ tests.**

Android · Rider
Kotlin · Jetpack Compose · Material 3 · Hilt · Retrofit · OkHttp · Coroutines · Flow · Google Maps SDK · Min SDK 26

Native port against **the same API contract** — 18 feature modules on convention plugins, 1,100+ tests, shared-domain onboarding, the shift's foreground service and the trip end to end running against the backend. **1,100+ tests.**

iOS — Buraq Schools
SwiftUI · Swift 5 · Mar '26 – now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public KYC status page and more. Next.js · English and Arabic (RTL), WCAG 2.2 AA. **1,100+ tests · live on Render since 16 Oct 2025.**

A second product on the same platform: **one app for parents** and **separate apps for supervisors** — the live bus, safe handovers, an offline-ready mode and an **iOS 26 Liquid Glass** interface. **1,000+ tests**, the Android port is under way.

One backend · one contract · eight client surfaces — and the company around them. Launching in the Nile, 87,000 license pools, a pricing engine fitted to Egyptian cash habits, and investor-ready materials. The gap: live plan. 3.2mm contacts, one author — so I know exactly what I will be doing at the launch. Node.js · TypeScript · PostgreSQL · Redis · BullMQ · Next.js · SwiftUI · Jetpack Compose · Terraform

Dec 2025 – Jun 2026 · 7M · VOLUNTEER

Senior iOS Engineer

HarvestEur — Voluntary Charity Project

- Designed an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management.

Mar 2018 – May 2019 · 1Y 2M · RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10k+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 – Mar 2018 · 1Y 7M · KSA

Senior iOS Engineer

HungerStation — Delivereroo Group

- Contributed to a major food-delivery platform serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API integration and scalability.

May 2016 – Aug 2016

iOS Developer

Alkawsh

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Spotify payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 – Sep 2015

iOS & Apple Watch Developer

Nile Design Co.

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift from WWDC 2014 onward.

May 2014 – May 2015

iOS Developer

UK Pro. Solutions Ltd.

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§03 Selected Projects

01 — RIDE-HAILING

Buraq — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis · BullMQ · Socket.IO · Next.js · SwiftUI · Jetpack Compose · Terraform

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, five realtime gateways, 2,900+ tests), a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqsyspot.com.**

- Founder & CTO · Nine Repos · 10k+ Tests

02 — MOBILITY

HaramBlur — Privacy Browser

MapKit · Core Location · Apple Pay · Push · watchOS

Compete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Powers Uber, Careem, Apple Pay, and cross-device experiences for 10M+ users.

- 4.7 / 5 — 213.8k+ ratings

03 — AI / PRIVACY

HaramBlur — Privacy Browser

SwiftUI · Create ML · WebKit · Core ML · Vision

Privacy-focused iOS browser with real-time, AI-powered content detection and filtering. On-device ML, smart blur effects, and live video monitoring.

- #1 Powered Privacy Browser

04 — DELIVERY

Marn — iPad POS

SwiftUI · Coredata · CloudKit · Real-time Sync

Elegant point-of-sale with sales-ops 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

- 4.8 / 5 — 2,417 ratings

05 — DELIVERY

HungerStation

UIKit · Firebase · Real-time APIs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

- 4.5 / 5 — 1.9M+ ratings

06 — COMMUNITY

Dalecio

MapKit · Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with 1,287 ratings and social integration.

- 4.5 / 5 — 1,287 ratings

§07 Honours

01 — Led an iOS engineering team for **7 consecutive years** on a POS platform serving **20k+ restaurants** and cafés — through the product's growth from launch scale to enterprise.

02 — Held a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03 — **Founded Buraq** (buraqsyspot.com), an Egyptian ride-hailing platform, and built all eleven repositories solo — backend, ops console, rider and captain apps on iOS and Android, Buraq Schools, and the public web app, live since Oct 2026 — behind **10,000+ automated tests.**

04 — Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05 — **10+ apps** published on the App Store, used by millions across MENA.

06 — **30+ projects** delivered across a 12-year career.

07 — Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
