• BURAQ — BURAQSOFT.COM ↗

Technical lead with **12+ years** hands-on and **8+ leading** — the engineer a team's hardest problems land on. For seven years I owned the architecture of an enterprise POS used by 20k+ restaurants and cafés on offline-first CoreData cores with cloud sync, bespoke conflict resolution, and the multi-year SwiftUI migration kept it modern without production pain. I've led building — since March 2020 as **Founder & CTO of Buraq** (buraqsoft.com), an Egyptian ride-hailing platform I built **solo:** a NestJS / PostgreSQL / Redis backend, a 28-screen operations console, rider and captain apps on iOS and Android, and delivery commitments the team could keep.

12+ YEARS HANDS-ON

8+ LEADING ENGINEERING TEAMS

35M+ REVENUE ASSESSED @APPLE APPS

30+ APPS SHIPPED & DELIVERED

§01 How I Lead Technically

01 — ARCHITECTURE & DIRECTION

Own the shape of the system

Module boundaries, data models, and the call graph — and the difference CoreData + cloud sync of an offline-first POS can't be undone. I built so a venue keeps trading when the network does not. Plus the **migration plans that keep a codebase current without stalling delivery**.

02 — MENTORING AT THE KEYBOARD

Lead by building alongside

Seven years mentoring a **5× engineer team** through pairing and code review, and that makes the next PR better. Technical direction lands faster when the lead is in the codebase too.

03 — STANDARDS IN CODE

The bar is a diff, not a document

Review culture, automated tests that gate merges, and CI/CD built from nothing **80% faster deployments**. The standards I wrote and enforced held the app at a **99.8–99.9% crash-free rate** in production.

04 — WHOLE-STACK DEPTH

Credible at every layer

Backend, web, iOS and Android — at Buraq I built and **every layer** myself. Full-stack depth, plus dispatch over a Redis geo-index, a 28-screen ops console, **2,900+ backend tests** and 10,000+ across the platform.

§02 Professional Experience

Aug 2019 → Aug 2026 · 7 years leading the iOS org
Riyadh, KSA

iOS Team Lead — Jahez Group

Led a 5-engineer iOS team for seven years — onboarding, mentoring, career growth, and the review culture behind an enterprise POS used by 20k+ restaurants and cafés.

Owned the technical roadmap and architecture: an offline-first CoreData core with cloud sync as a venue keeps trading when the network does not.

Set the engineering standards — module boundaries, code review, automated testing — that held the app at a 99.8–99.9% crash-free rate in production.

Drove the multi-year migration to SwiftUI, Combine and async/await without pausing feature delivery — and made the case for it to product leadership.

Built CI/CD and the release process from scratch, cutting deployment time 60% and shipping every hotfix the same day.

Ran the performance programme (40% faster load times) and designed the table-management, order-processing and inventory systems at the heart of the product.

Partnered with design, QA and backend leadership on scope, estimates and delivery commitments the team could keep.

Mar 2026 → Present · 1 month
CAIRO · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqsoft.com · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone:** shape the stack, set the standards, and built eleven production fronts from empty — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package per platform, and the public web app **live at buraqsoft.com**. Every layer governed by explicit rules (dependency-cruiser, ESLint, Prettier, strict TypeScript) so the codebase stays idempotent, mutations, double-safe, ongoing, auditable from day one, and a CI suite that gates the merge. Now preparing a cash-only beta in Sohag.

Backend API
NestJS · TypeScript · Pnpm · 736 + now

Modular monolith, **22 modules** in an ascetic graph — **trip state machine, scored waterfall dispatch** over a Redis geo-index, **JWT auth with refresh rotation**, **double-entry ledger** with cash and wallet accounts, **Paymob** (Fawry), scheduled and multi-stop rides, the realtime **Socket.IO gateway**, FCM / Apple push, and ops auth with RBAC, idempotency and audit log. **330+ endpoints** over 68 controllers, 42 entities, **2,900+ tests**, Swagger docs.

Ops Console
Next.js 14 · Jul '26 → now

29-screen ops system — live **MapLibre** trip map with dispatched markers, dispatch and trip detail, KYC review, finance reconciliation, refunds and payouts, cash control, and a live activity feed, built on **Google OIDC** and role-based access.

iOS · Rider & Captain
SwiftUI · MVVM · 6 · Jul '26 → now

Two native **SwiftUI** apps on a shared **BuraCore** package (domain · networking · design system), version-pinned — the full **trip lifecycle** on live GPS, Socket.IO feeds with fresh-token reconnect, chat, wallet and earnings, **Arabic Activities**, Siri voice booking, on-device ID verification, **Apple** earnings and expenses — **260 views, 1,000+ tests**, strict concurrency.

Android · Captain
Kotlin · Jetpack Compose · Aug '26 → now

Native port against the **same API contract** — 18 feature modules on convention plugins, a shared Kotlin domain core, offline-first foreground service, the map and trip to end running against the backend · **1,300+ tests**.

Android · Rider
Kotlin · Jetpack Compose · Sep '26 → now

Screen-by-screen parity port of the iOS rider app — 11 feature modules, **1,000+ tests**, foreground realtime service, **Arabic Activities**, on-device ID verification, **Google** earnings and expenses — **260 views, 1,000+ tests**, strict concurrency.

Web · buraqsoft.com
Next.js 14 · React 19 · Oct '26 → now

Marketing site, **rider web app** with live trip tracking, **captain onboarding portal** with on-device document OCR, public share pages and app links — English and Arabic (RTL), **HCAQ 2.2 AA**, **1,800+ tests** · **live on Render since 19 Oct 2026**.

iOS · Buraq Schools
SwiftUI · Swift 5 · Nov '26 → now

A second product on the same platform: **one app for parents and school bus supervisors** — the live bus, safe handovers, an offline trip mode and an **iOS 26 Liquid Glass** interface · **1,000+ tests**, the Android port is under way.

One backend · one contract · eight client surfaces · and the company around them: incorporation, the live 87/358 license path, a pricing engine fitted to 636 observed fares, the business plan and investor deck — the live plan, 3.5bn+ commits, one author — so I know exactly what I will be asking of the team I'll hire.

Dec 2025 → Jun 2026 · 6 months
VOLUNTEER

Senior iOS Engineer

NurseBuddy — Voluntary Charity Project

Designed an architecture integrating on-device machine learning for real-time speech analysis.

Built a seamless communication layer between native iOS and web-based content.

Implemented efficient image processing with region-based and full-image blur effects.

Created a real-time video monitoring system for continuous content filtering.

Developed smart banner blocking and optimised memory management throughout.

Mar 2018 → May 2019 · 1 year 3 months
Riyadh, KSA

iOS Team Lead

Tap — The Ride Hailing App

Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.

Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.

Integrated Apple Pay, HyperPay, and push notification infrastructure.

Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.

Built the driver rating system and real-time fare calculation engine.

Sep 2016 → Mar 2018 · 1 year 6 months
KSA

Senior iOS Engineer

HungerStation — Deliveroo Group

Contributed to a major food-delivery platform serving 20M+ users.

Optimised app performance for high-volume transaction processing.

Implemented real-time order tracking and delivery optimisation.

Collaborated with backend teams on API design and integration.

May 2016 → Aug 2016

iOS Developer

Al Aqsath

Developed food-ordering apps with Firebase integration and real-time features.

Implemented Spreedly payments and live-chat functionality.

Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 → Sep 2015

iOS & Apple Watch Developer

Nile Design Co.

Early adopter of Apple Watch development (watchOS 1-2).

Built a foundation in iOS and watchOS app development.

Adopted Swift5 from WWDC 2019 onward.

May 2014 → May 2015

iOS Developer

HR Pro. Solutions Ltd.

Foundation iOS experience in Objective-C and early Swift.

Built social networks and e-commerce platforms.

Learned core iOS principles and App Store deployment.

§03 Selected Projects

01 — FULL STACK

Ryzan — Ride-Hailing (Founded Mar 2026)

NestJS · TypeScript · PostgreSQL · Redis
Next.js · React 19 · Socket.IO · Jotai · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend with a Redis geo-index, scored dispatch, double-entry ledger, five-realtime gateways, 2,900+ tests, a 29-screen ops console, rider and captain apps on iOS and Android, and the public web app **live at buraqsoft.com**.

• Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

• 4.8 / 5 — 2,437 ratings

03 — MOBILITY

Ego — Ride Hailing

MapKit · Core Location · Apple Pay · Push Notifs

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

• 4.7 / 5 — 23.8K+ ratings

04 — DELIVERY

HungerStation

UIKit · Firebase · Real-time APIs · Perf Optimization

Major food-delivery platform serving 20M+ users across Saudi Arabia. Focused on performance and real-time order tracking.

• 4.5 / 5 — 1.9M+ ratings

05 — PRIVACY

Haramdhur — Privacy Browser

SwiftUI · Combine · Metal · Background Tasks · Vision

Privacy-focused iOS browser with real-time, AI-powered content blocking. On-device ML, smart blur effects, and live video monitoring.

• #2 Powered Privacy Browser

06 — COMMUNITY

Dalecło

Core Location · Social SDKs · Community

Muslim community app for users across the US — prayer times, mosque finder, and community features with enhanced location and social integration.

• 4.5 / 5 — 1,287 ratings

§04 Stack & Craft

§07 Honours

01
Led an iOS engineering team for **7 consecutive years** on a POS platform used by **20k+ restaurants** and cafés — through the product's growth from early stage to enterprise.

02
Held a **99.8–99.9% crash-free rate** and cut deployment time **60%** by building the standards, tests and CI/CD the team ran on.

03
Founded Buraq (buraqsoft.com), an Egyptian ride-hailing platform, and built all eleven repositories solo — backend, ops console, rider and captain apps on iOS and Android, Buraq Schools, and the public web app, live since Oct 2026 — behind **10,000+ automated tests**.

04
Built a food-delivery platform serving **20M+ users** across Saudi Arabia and Bahrain, and a ride-hailing ecosystem serving **10M+ users** in Saudi Arabia.

05
10+ apps published on the App Store, used by millions across MENA.

06
30+ projects delivered across a 12-year career.

07
Early Swift adopter (WWDC 2014) and early SwiftUI adopter (WWDC 2019) — a habit of betting on the right platform shift early.
