→ SEE THE LIVE INTERACTIVE EDITION ↗ · → BURAQ — BURAQEGYPT.COM ↗

Senior software engineer with **12+ years** shipping production software — native iOS first, now across Android, backend and web. I have built apps used by 35M+ people: HungerStation, Ego ride-hailing, and for seven years the Marrn POS used by 20k+ restaurants across the GCC. I founded and co-lead Buraq's core engineering team, where I've built a **99.8–99.9% crash-free** rate. Since March 2026 I am **Founder & CTO of Buraq** (buraqegypt.com), an Egyptian ride-hailing platform I built end to end, **solo**: a NestJS / PostgreSQL / Redis backend, a 29-screen operations console, the public web app, and native iOS & Android apps on one API contract.

12+	35M+	99.8%+	10k+
YEARS HANDS-ON	USERS REACHED ACROSS SHIPPED APPS	CRASH-FREE RATE IN PRODUCTION	AUTOMATED TESTS ACROSS BURAQ

§ 01 How I Engineer

01 — SYSTEMS DESIGN

Design for the failure case

An offline-first CoreData + sync engine that I wrote as a versus keeps trading when the network does not. A **single-writer, sorted dispatch** over a Redis geo index and a **double-entry ledger** with idempotent mutations, so a retry can never double-charge.

02 — QUALITY YOU CAN MEASURE

Tests gate the merge

Automated tests that block merges, CI/CD built from nothing (**60% faster deployments**), and a **99.8–99.9% crash-free rate** in production. At Buraq: **2,900+ backend, 1,000+ iOS** and **4,000+ Android** tests.

03 — SHIP WITHOUT STOPPING

Modernise in flight

A multi-year move to SwiftUI, Combine and async/await without pausing feature delivery. Actors and structured concurrency in new code; Swift 6 strict concurrency, actors and structured concurrency in new code.

04 — END-TO-END OWNERSHIP

Credible at every layer

Native iOS (SwiftUI) and Android (Kotlin / Compose) clients on shared, versioned core libraries; NestJS / PostgreSQL / Redis backends; Next.js consoles and the public web app. At Buraq I build and run **every layer myself**.

§ 02 Professional Experience

Aug 2019 → Aug 2026 · RIYADH, KSA

iOS Team Lead · 7 years touching the iOS org

Marrn — Cairo, Egypt

- **Owned the architecture** of an enterprise POS used by 20k+ restaurants and cafés: an offline-first CoreData core with cloud sync, built so a versus keeps trading when the network does not.
- **Designed the core systems** — table management, order processing and inventory — in Swift 5 and UIKit.
- **Drove the multi-year migration** to SwiftUI, Combine and async/await without pausing feature delivery.
- **Held a 99.8–99.9% crash-free rate** in production through clear module boundaries, code review and automated tests, for seven years.
- **Built CI/CD and the release process from scratch**, cutting deployment time 60%, and ran the performance programme behind 40% faster load times.
- Led and mentored a **5+ engineer iOS team** for seven years, and partnered with product, design and backend on scope and estimates.

Mar 2026 → Present · CAIRO · FOUNDER

Founder & CTO — iOS · Android · Backend · Web

Buraq — buraqegypt.com · Buraq Technologies

Founded an Egyptian ride-hailing platform and have carried its **entire technical scope alone**: choose the stack, set the standards, and build every application from zero — a hardened backend and operations console, rider and captain apps on **iOS and Android**, a shared core package and the public web app, **live at buraqegypt.com**. Every layer governed by explicit rules: idempotent mutations, double-entry accounting, server-authoritative state machines, and a CI suite that gates the merge. Running a cash-only loan bets is Cairo.

Backend API
NestJS · TypeScript · Mar '26 → now

Modular monolith, **22 modules** in an acyclic graph — **trip state machine**, **scored weighted dispatch** over a Redis geo index, admin-tunable pricing across six ride tiers, **double-entry ledger** with cash-and-card settlement (Paymob), fraud rules, support tickets, and a real-time Socket.IO gateway. **2,900+ tests** (Jest + Supertest) with RBAC, idempotency and state-machine coverage; **130+ endpoints** over 55 controllers, 62 entities, **2,900+ tests**. Swagger docs.

Ops Console
Next.js 15 · RTL · 3× · now

29 screen ops surface — live **MapLibre** trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, fraud and support queues, admin map **zone editor**, feature flags, audit log. **Google SSO** English and Arabic, LTR+RTL.

iOS · Rider & Captain
SwiftUI · Swift 6 · Nov '24 → now

Two native **SwiftUI** apps on a shared **BuraqCore** package (domain · networking · design system, version-pinned) — the full **trip lifecycle** on the GPS, Socket.IO with fresh-token reconnect, chat, wallet and payments. **Live Activities**, Siri voice booking, on-device ID verification, captain earnings and navigation. **~240 views, 1,000+ tests**, strict concurrency.

Android · Captain
Kotlin · Jetpack Compose · May '26 → now

Native port against **the same API contract** — 18 feature modules on one persistent WebSocket, a pure-Kotlin domain, onboarding, the shift's foreground service and the trip end to end running against the backend. **1,000+ tests**.

Android · Rider
Kotlin · Jetpack Compose · May '26 → now

Screen-by-screen parity port of the iOS rider app — 17 feature modules on a published **buraq-core-android** (GitHub Packages). **2,200+ tests**, Gradle convention plugins, lint-gated, Turkish + English, dark and RTL.

Web · buraqegypt.com
Next.js 16 · React 19 · Oct '25 → now

Marketing site, **rider web app** with live-trip tracking, **captain onboarding portal** with on-device document OCR, public trip-share pages and app links · English and Arabic (RTL), WCAG 2.2 AA, **1,800+ tests · live on Render since 15 Oct 2026.**

iOS · Buraq Schools
SwiftUI · Swift 6 · Nov '24 → now

A second product on the same platform: **one app for parents and school-bus supervisors** — in the live store, **v1.0.0 (build 2)** now available and on **iOS 26 Liquid Glass** interface · **1,000+ tests**, the Android port is under way.

One backend · one contract · eight client surfaces · and the company around them: incorporation, the Law 151/2020 licence path, a privacy policy and ToS observed here, the business and investor materials, the go-to-market. Solo, end to end — and I write exactly what I will be asking of the team I hire.

Dec 2025 → Jun 2026 · VOLUNTEER

Senior iOS Engineer

HarvestCurl — Voluntary Charity Project

- Architected an architecture integrating on-device machine learning for real-time content analysis.
- Built a seamless communication layer between native iOS and web-based content.
- Implemented efficient image processing with region-based and full-image blur effects.
- Created a real-time video monitoring system for continuous content filtering.
- Developed smart banner blocking and optimised memory management throughout.

Mar 2018 → May 2019 · RIYADH, KSA

iOS Team Lead

Ego — The Ride Hailing App

- Led iOS delivery for a complete ride-hailing ecosystem (rider, driver, watchOS) serving 10M+ users in Saudi Arabia.
- Implemented real-time GPS tracking and navigation with MapKit and optimised route algorithms.
- Integrated Apple Pay, HyperPay, and push-notification infrastructure.
- Created seamless iPhone ↔ Apple Watch handoff for continuous ride tracking.
- Built the driver rating system and real-time fare calculation engine.

Sep 2016 → Mar 2018 · KSA

Senior iOS Engineer

HungerStation — DeliveryHero Group

- Contributed to one of the major food-delivery platforms serving 20M+ users.
- Optimised app performance for high-volume transaction processing.
- Implemented real-time order tracking and delivery optimisation.
- Collaborated with backend teams on API design and integration.

Aug 2016 → Aug 2016 · KSA

iOS Developer

AlAqsa94 —

- Developed food-ordering apps with Firebase integration and real-time features.
- Implemented Syrian payments and live-chat functionality.
- Built responsive UI with Auto Layout across multiple device sizes.

Jul 2015 → Sep 2015 · KSA

iOS & Apple Watch Developer

Nile Design Co. —

- Early adopter of Apple Watch development (watchOS 1-2).
- Built a foundation in iOS and watchOS app development.
- Adopted Swift from WWDC 2014 onward.

May 2014 → May 2015 · KSA

iOS Developer

UK Pro. Solutions Ltd. —

- Foundation iOS experience in Objective-C and early Swift.
- Built social networks and e-commerce platforms.
- Learned core iOS principles and App Store deployment.

§ 03 Selected Projects

01 — FULL-STACK

Buraq — Ride-Hailing *Founded Mar 2026*

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Next.js · SwiftUI · Kotlin · Jetpack Compose

Egyptian ride-hailing platform I founded and built solo: a hardened NestJS backend (trip state machine, scored dispatch, double-entry ledger, fee realtime gateway), 2,900+ tests, a 29-screen ops console, rider and captain apps on **iOS and Android**, and the public web app **live at buraqegypt.com**.

- Founder & CTO · Nine Repos · 10k+ Tests

02 — ENTERPRISE

Marrn — iPad POS

SwiftUI · CoreData · CloudKit · Real-time Sync

Enterprise point-of-sale serving 20k+ restaurants and cafés across Saudi Arabia. Offline-first architecture, complex table management, real-time order processing — **the product my iOS team owned for seven years.**

- 4.8 / 5 ★ · 2,417 ratings

03 — MOBILITY

HungerStation

SwiftUI · Firebase · Real-time APIs · Performance

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

- 4.5 / 5 ★ · 1.9M+ ratings

04 — DELIVERY

HungerStation

SwiftUI · Firebase · Real-time APIs · Performance

Major food-delivery platform serving 20M+ users across Saudi Arabia and Bahrain. Focused on performance and real-time order tracking.

- 4.5 / 5 ★ · 1.9M+ ratings

05 — MOBILITY

Ego

MapKit · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS, Apple Pay, and cross-device experiences for 10M+ users.

- 4.7 / 5 ★ · 211.8k+ ratings

06 — AI / PRIVACY

HarumBlur — Privacy Browser

SwiftUI · CoreML · WebKit · CoreImage · Vision

Privacy-first iOS browser with on-device AI that automatically detects and blurs faces, text, and sensitive content. Zero data collection, no servers, no tracking. Powered entirely by Apple's Neural Engine.

- #1 Powered Privacy Browser

07 — BACKEND

HarumBlur

NestJS · TypeScript · PostgreSQL · TypeORM · Redis · GraphQL · Firebase · CloudKit · Swagger/OpenAPI

Production backend for HarumBlur — GraphQL + REST APIs, Firebase Auth, CloudKit sync, and Swagger documentation.

- Live at api.harumblur.com

08 — AI / ML

HarumBlur — On-Device Intelligence

CoreML · Vision · CoreImage · Natural Language

Real-time face detection and blurring, text recognition, and sensitive content classification — all running on the Neural Engine. Zero cloud dependency.

- Face Detection · Text Recognition · Content Classification

09 — WEB

Buraq — Public Web App

Next.js · Tailwind CSS · Framer Motion · Vercel

Public-facing web app for Buraq: marketing site, rider web app with live-trip tracking, captain onboarding portal with on-device document OCR, public trip-share pages and app links. English and Arabic (RTL), WCAG 2.2 AA.

- Live at buraqegypt.com

10 — WEB

Buraq — Ops Console

Next.js · TypeScript · Tailwind CSS · Socket.IO · MapLibre

29-screen operations console for Buraq: live trips map with demand heatmap, dispatch and SOS boards, KYC review, finance reconciliation, fraud and support queues, admin map zone editor, feature flags, audit log. Google SSO, English and Arabic, LTR+RTL.

- 29 screens · Live Trips Map · Zone Editor · Google SSO

11 — BACKEND

Buraq — Backend API

NestJS · TypeScript · PostgreSQL · Redis · Socket.IO · Swagger/OpenAPI

Modular monolith, 22 modules in an acyclic graph: trip state machine, scored weighted dispatch over a Redis geo index, admin-tunable pricing across six ride tiers, double-entry ledger with cash-and-card settlement (Paymob), fraud rules, support tickets, and a real-time Socket.IO gateway. 130+ endpoints over 55 controllers, 62 entities, 2,900+ tests. Swagger docs.

- 130+ endpoints · 2,900+ tests · Swagger docs

12 — MOBILITY

Ego — The Ride Hailing App

SwiftUI · Core Location · Apple Pay · Push · watchOS

Complete ride-hailing ecosystem: rider app, driver app, and Apple Watch companion. Real-time GPS tracking, Apple Pay, and cross-device experiences for 10M+ users.

- 4.7 / 5 ★ · 211.8k+ ratings

§ 04 Stack & Craft

ENGINEERING PRACTICE

System Design · Automated Testing · API Design · Offline-First & Sync · Realtime (WebSockets) · Performance Profiling · CI/CD · Code Review · Versioned SDKs · Mentoring · Agile / Scrum
